

Imperial Fishing Catalogue

# 2018

...way back home!

Max Nollert with „Godzilla’s younger brother“, May 2017

*...feel good!*

Max Nollert, German middle Moselle, IB Carptrack Scopana.Love Boilies

**Imperial Fishing 2018 - way back home!**

Imperial Fishing 2018 - way back home! One of the most beautiful moments in our hobby, after a successful and possibly also very strenuous trip with ups and downs, is to let all this on the way home reminding step by step in the head again. With this probably sublime feeling of having done everything right in the end, we then happily meet the loved ones at home!

The motto „... way back home!“ adorns the new catalog 2018 and should bring as many of those moments as possible to every reader, customer and fan ...

*max nollert & team*

**Mission Statement**

We may have gotten your attention through the continuous success of some of the best known carp anglers. Your enthusiasm is the one ingredient that you bring into the mix. We won't let you down!

Carp are pretty omnivorous animals, but there are certainly some substances and flavours they prefer! To dissect and identify these is not a matter of hours, days or weeks. Even the use of different products over several months still leaves questions and only shows some tendencies, rather than facts. After decades of fishing and the cooperation with some very successful carp anglers, we created and developed the Carptrack Range. Carptrack, that means products with an absolutely outstanding attraction, whilst providing valuable nutrition. No matter if it is a short session without pre-baiting or a long campaign, carp will seek out Imperial Baits products and come back for more.

**CONTENTS**

Carp fishing is not the most important thing in the world, but for many it is the greatest! Max Nollert

# New 2018: Scopana.Love Baitränge

# The secret behind the new record breaker

**SCOPANA  
LOVE**

**ALSO IN WINTER A CATCH GUARANTOR!**

## Scopana Love breaks all records!

### Max Nollert about the test phase of Scopana Love boilies:

„It was different than usual! We not only tested with our team, but also let our customers participate in the three test series of the new Cartrack boilie. From the beginning, in the spring of 2017, great catch reports and feedbacks came in regularly, so we were very satisfied here. So it went through the summer. But when we released the improved version „Scopana.Love 3tuned“ in October, which is the final version today, we were suddenly hit-and-run and the catch reports really toppled over. We had not experienced that in this crowd so far. Also in the winter of 17/18 we listened regularly to impressive impressions on Scopana.Love Boilies. „A year round bait of the very first kindness?“

### What is behind this, or better said, in them?

Peanut flour roasted (extreme intense aroma, makes the carp addicted), the best egg feed from Witte Molen (well known since the 90s), protein concentrate (which is in every Cartrack boilie), ADD FAT (rounds out the flavour beautifully), corn meal, hard wheat semolina, Lac and Eggalbumin (for a strong and resistant bait), scopex butter flavour, pineapple flavour, a bit of roasted peanut flavour on top, Liquid Amino and NHDC (natural sweetener which is 1800 times sweeter than sugar and is not at all bitter or tart).

**YouTube Video online: The boilie secret too IB Cartrack Scopana.Love - all secrets inside!**

### The BONUS for all fruit lovers: pineapple

The new fruity sweet pineapple flavor is already in the Scopana.Love boilie. There was great demand for this very aromatic and very powerful flavour so we decided to bring out this separately in the 50 and 300ml bottle so to have an Amino Dip and an Amino Gel. There are also available the Power Powder in the 25 or 100g container.

- The complete Range + Pineapple Special**
- Scopana.Love Boilies in 16, 20, 24 and 30mm
  - Scopana.Love Boilie Mix
  - Scopana.Love Flying Hookbaits (Pop Ups) in 16, 20 and 24 mm

  - Scopana.Love (Scopex-Butter, Pineapple & Roasted Peanut mixed), Scopex-Butter, Pineapple, Roasted Peanut
  - Dips & Gels**
  - Scopana.Love, Scopex-Butter, Pineapple, Roasted Peanut
  - Power Powders 25g & 100g**
  - Scopex-Butter, Pineapple, Roasted Peanut

# Our boilies are...

## successful for over 14 years!

Exactly the same mix that we use for our legendary Carptrack boilies, is available to buy as Carptrack boilie mix, for those of you, who prefer rolling themselves. In addition to this successful mix, we use highly attractive flavours and additives like Carptrack in-Liquid, Carptrack Liquid Amino, Essential Oils as well as NHDC Liquid. We try to offer everything you need to improve your angling and allow you to fully concentrate on your location and perseverance.

## unique and stand out from the crowd!

Our boilies all in one! Attractors, instant and long session bait!  
Our mission is the creation and production of boilies with a substantial nutritional value, balanced to the carp's needs, produced with various natural and highly attractive meals. We make sure these are partly highly soluble and work as palatants even from a distance to get the carp's interest. Sophisticated stabilisation against mould, whilst retaining the superb quality is one of our top priorities.

## fresher for longer!

The ability to retain moisture is very much appreciated by our loyal customers. Stabilising the Carptrack boilies is a time consuming and expensive process, but absolutely essential. The taste is barely affected. The boilies are protected from mould for a minimum of two years in the bag. It also adds the benefit that even once the bag has been opened, the product doesn't dry out as quickly and retains their juiciness over a long period of time. This is a very important bonus, which is a top priority for many carp anglers. No matter when you need them, your boilies will be fresh and catchy!

## high in protein and filled with attractors!

Monster-Liver, Monster's Paradise, CRAWFISH and Fish have the highest amount of protein – closely followed by Elite and Elite Strawberry. Balancing in regards to the effect of the attractors, which derives through the amino acid profile of the proteins, we further enriched them with Scopana.Love, Osmotic Oriental Spice, Birdfood Banana Boilies and Uncle Bait – Extra Strong with highly attractive meals and liquid components, such as inLiquid, Liquid Amino and the fabulous Carptrack NHDC.

## the complete package – smell, taste and nutrition!

Attractive, water soluble smell and taste, a current nutritional value, which provides the fish with energy and the meals high in protein, derived through the amino acid profile, make the Carptrack Range, consisting of additives, mixes and boilies the most exceptional range in the current carp sector – now in its 15th year!

## the guaranteed catch!

The results on this bait have been exceptional right from the start and are to this day. The feedback from our customers and our team anglers are our motivation to carry on each and every day.

*Imperial Baits – the art of Bait!*

## New to IB?

You have to sometimes risk believing in something new, it will lead to total confidence. Max Nollert

Nico Milz, 24 Kilo caught with CRAWFISH black & white Boilies, on a german club lake

Nico Milz has fished a gravel pit along the German highway for over 2 years. He knew that in this water there was a big fish over 20kg that was not caught very often. The water is full of natural food sources such as mussels, snails and crabs.

Nico chose the IB Carptrack CRAWFISH black & white boilie as he knew that this bait works very well in waters with crab in them. In September 2017 the time came, Nico was able to hold this special fish in his hands.

2 kg	24,90 €	
5 kg	59,90 €	
8 kg	92,90 €	in iBox

16 mm • 20 mm • 24 mm • 30 mm

## CRAWFISH black & white Boilie

27% crawfish meal (the entire animal), fish meal, Add Fat, concentrated protein, squid liver, sweetbread and a tiny bit of NHDC (natural sweetener), which stimulates feeding even more, give the CRAWFISH boilie a very intense, natural taste and smell. It's no surprise that carp have been taken to this crab-creation in all kinds of waters so far and apparently are quite fond of it. The two flavours Crawfish and Monster-Crab make this an absolute outstanding boilie and motivate the carp to take it and keep feeding on it. We practice science on the bank and the results couldn't be more obvious. Try it and catch your new PB on CRAWFISH. We'd love to see your pictures!

## Why two contrasting colours (black & white)?

One can never be entirely certain which colour will attract the most attention when lying on the ground. With the contrasting mix you can be sure that your boilies will stand out!

**MONSTER'S PARADISE**

Ernst Helmhart, 25 Kilo plus with Monster's Paradise Boilies and Liquid-Powder Paste

**UNCLE BAIT EXTRA STRONG**

Maïke Prinz, BIG ONE caught on Uncle Bait - Extra Strong!

Ernst Helmhart in September 2017 fed daily 2 kilo IB Carptrack Monster's Paradise boilies along a reed bank. He spread his bait along an area of 50 meters. The water temperature was stable at 18c and the wind was blowing steadily for many straight days onto his hot spot. On the

day he fished he also used inLiquid and Powder on his „MoPa“ boilies to ensure that he had the optimal attraction under the water. His hookbait was wrapped in Liquid-Powder Paste and a short time later he was able to net this 25 kilo plus fish.

Maïke Prinz likes fishing the natural lakes in Mecklenburg Germany. In a summer session in 2017 she had an unforgettable streak of big fish. She found the perfect spot, a drop off falling from 1,4 to 1,8m. paired with see roses and weeds. She could also make out many crabs on the

hard bottom. As there was much natural food available she chose to use the bright pink Uncle Bait- Extra Strong boilies. It was all action after that and one BIG ONE after the other landed in the net.

**ATTENTION! HIGHLY ADDICTIVE!**

**Uncle Bait - Extra Strong**  
 In 2016 we decided to further develop the extremely successful Uncle Bait 'The Boilie'. The objective was to get the absolute most out of it for long term sessions and especially pre-baiting.  
**Max Nollert** and **Julian Jurkewitz** experimented with different mixes of strawberries and creams, which are sourced from various European countries to find the absolute perfect ratio between the components.  
 With the addition of our well established IB Carptrack Liquid Amino and the fabulous sweetness of NHDC, we managed to create an amazing harmony of outstanding aromas. Carp agree!

**Try it for yourself, but be aware, highly addictive!**

For more from this amazing product, also read the report 'Guppy – surprise on the Mosel-bank' (see page 26 in the catalogue 2017). Caught on Uncle Bait 20mm + 16mm Pop Up.

A gentle bomb, unless you unleash it in the water, where it turns into a sensory explosion!

**Monster's Paradise Boilie**  
 The bomb's components are: 5% Hungarian Paprika, 5% Spanish Pepper (Hath's, which is even hotter than Robin Red), 2% Asian Garlic Powder, plus NHDC – The Original, which enhances all ingredients even more und gives the boilie a slight, very pleasant sweetness. It is rolled with the IB Carptrack Bloodworm Flavour and Essential Oil Garlic. This highly concentrated garlic oil can now be purchased from us in a dropper. But be careful and refrain from using it indoors!

A powerful boilie, with consistent big catch results, no matter if short sessions or longer feeding campaigns.

Sylvain Halus, Legend Carp Rod in action!

Uncle Bait has convinced again!

preparation is everything!

**Damien Simonelli**, Cassien carp over 25 kg caught on BIG Fish Boilies, between the reed

**Damien Simonelli** lives in south France, close to the legendary Lac de Saint Cassien. This wonderful mirror carp was well over the 25 kilo mark. With the help of a diving mask and fins Damien placed his BIG Fish boilie rig between some reeds at 3m depth. Earlier he had been able to

spot some bubbles and knew there must be a bigger fish in the area. He spread one kg of boilies in the reeds. It took only an hour and there was movement to be seen in the reeds, moments later... fullrun!

**Spoilt for choice in the search for the perfect boilie?** This one has convinced anglers and carp everywhere!

**Fish Boilie – Now even stronger!**

The IB Carptrack Fish Boilie is a boilie from the very beginnings of Imperial Baits and still one of our absolute bestsellers. The fish meal LT94 is gently dried, in order to contain the over 74% of amino acid and protein contents. The pre-digested fish meal is a highly soluble fish protein concentrate with 84% protein content, which combined with the amino acid profile, it is extremely desirable for the carp. The meal has a water solubility of 75% and creates a strong attraction power also in cold water. This amazingly successful boilie is perfectly rounded up by the extremely water soluble protein concentrate, the Liquid Amino, the Original Indian Essential Oil Black Pepper and the Carptrack BIG Fish Flavour.

If the BIG Fish Boilie could speak, it would tell great stories of unforgettable sessions and catches across all of Europe.

**Kurt Trinkl**, great success in a short session with IB Carptrack Monster-Liver Boilies at a mountain lake in Austria!

# IMPERIAL BAIT CARPTRACK RAMBO HOOKBAITS

RAMBO Hookbaits – extra strong, feather light and sinking!

You can only catch a fish if you have a bait on the hair. Crabs, catfish and increasingly gobies are making the carp angler's life difficult at times. So we need to be stronger than them, if necessary over long periods of time, for example when long-range fishing. The longer it lays, the smaller the risk – that is the carp's experience that it normally operates on. This has not been scientifically proven, however we are certain that it is difficult to find a scientist who knows more about their behaviour than us carp anglers, who love nothing more than observing these fantastic animals. As we made the Rambos almost weightless in the water, they perfectly round up the hook bait collection to fish successfully in every kind of condition. And due to their strength without being too hard, they last until the carp is on spot! **RAMBO – throw them in to pull 'em out!**

30, 35 mm	29,90 €

### Fight the mould, for weeks:

#### Imperial Baits Carptrack Stabil'it

- gentle stabilisation without stinging side effects
- boilies are easier to roll

**Requirements:** operate clean and hygienically, dry the boilies for a minimum of one day (not on cardboard or cloth), store cool, dry and protect them from direct sunlight

300 ml	7,50 €
1000 ml	17,90 €
5000 ml	49,90 €

**Dosage:** 50-80ml/1kg

IB Carptrack boilies mixes work fantastically when moulded around the lead. A proven method to distract crabs from the hook-bait and at the same time make the presentation even more attractive.

### IB Carptrack Boilie Mixes

Developed by Max Nollert and his team. They are fully loaded and selective. From the beginning a revolution in regards to attractiveness and nutrition and most of all: water soluble by time. The mixes are a result of extensive studies in the search for the ultimate bait. Made of meals of exceptional quality, the mixes guarantee round, hard boilies (through lactalbumin, eggalbumin) with the highest effectiveness for your success. All across Europe countless anglers trust the Carptrack formula in these special mixes.

Scopana.Love   Birdfood Banana   Elite   Elite Strawberry   BIG Fish   Monster-Liver   Osmotic Oriental Spice   Monster's Paradise

BPS Spraydose 600 ml 9,90 €

### Easier and better with BPS!

#### Boilie Protector Spray (BPS)

Optimise your production: effortlessly roll perfectly round, hard boilies for immediate use. One bottle of BPS will last for about 100 kg Boilies. Lightly spraying your gun, the rollers or the dough offers these **advantages:**

1. Hard dough, which can be easier pushed through the gun
2. Dough cords and boilies won't stick together and remain their form
3. Boilies become perfectly round on the roller
4. Water intake during cooking is reduced to a minimum, which allows a drying time of only 1-2 hours, leaving them hard and ready for use.
5. Minimal dilution of ingredients during cooking, which results in less murky, less foamy water.
6. BPS is taste- and smell neutral
7. BPS will cause more intense aroma of the finished boilies
8. Utensils are easily cleaned, as nothing sticks.

## Encouraging the carp to feed with Flavours & E. Oils

**Max Nollert:** "After all these years as a very active carp angler and bait producer, I am still amazed how much influence Flavours and Essential Oils have on the carp's feeding habits."

„Not without my flavors!“

**NEW: NOW ALSO AVAILABLE IN THE 300 ML BOTTLE INCL. MEASURING JUG**

**Alex Neu** likes to use Amino Pellets in the spring time because of lower risk to overfeed the carp. Due to the faster dissolution time of the pellets, the danger is not very high.

## Aromatise your baits

### Power Powders ...

... are incredibly strong in taste with a potent aroma. A dosage of only 1gram per kg bait is enough to give the bait the wonderful Carptrack touch.

**ALL FLAVOURS NOW ALSO AVAILABLE AS POWER POWDERS!**

Flavour	Content	Dosage	Price
Power Powders	100 g	1 - 5 g / kg	12,90 €
Pocket Power Powders	25 g	1 - 5 g / kg	5,90 €

# All Pop Up Hookbaits come in the handy Power Tower System Box

## Pop Ups (Flying Hookbaits)

These floating hook baits are made of 65% boilie mix, including all aroma and 35% of Pop Up Mix. Therefore they provide the same enticing profile as the equivalent sinkers.

## Half'n Half (half boilie, half Pop Up)

Due to the balance of half regular boilie and half white V-Pop Up, these Half'n Halves are lighter than a sinker, but still heavier than a pop up. For technical reasons, occasionally a small lead, just beneath the bait on the hair is required to achieve the absolute perfect buoyancy. These are taken by the carp effortlessly.

## Added hook efficiency:

White will always point up, which improves the presentation and arrangement on the hair.

## V-Pop Ups (fluorescent bright colour)

Naturally buoyant hook baits in visibly noticeable bright colours, which can be seen even from a distance. Use Carptrack Flavours like dips, gels or aromas to enhance to your own taste.

## V-Pop - the visible art of bait!

Pop Ups 16 mm	65 g	7,90 €
Pop Ups 20 mm	65 g	6,90 €
Pop Ups 24 mm	65 g	5,90 €

**Varieties:** Scopana.Love, Crawfish, Monster's Paradise, Monster-Liver, Elite, BIG Fish, Elite Strawberry, Osmotic Oriental Spice, Banana, Uncle Bait

Ludovic Lafond with son Stan

## The IB Power Tower System...

...the perfect way to organise the products you need for your fishing trip. The boxes can be used individually, for example for small items or your own food and allow you to have everything in place, clutter free and space saving, ready when you need it.

- Stackable, with screw threads
- Clutter free and organised storage
- Great for small parts
- Clean and practical storage for your food like salt, pepper, sugar, tea bags, dry soups...
- Contents visible from the outside

# Amino Dips & Gels

Seduce the carp and make them seek out your bait.

Make your hook bait stand out with the help of Amino Dips and Gels. Get the carp's attention and a quicker bite. The Amino Dips and Gels clearly set themselves apart, visibly and with their aroma.

## Get a catch quicker with pimped hook baits!

Soak your hook bait, no matter if sinker, pop ups or particles, for at least 24 hours in Amino Dips. You can even soak them for days, weeks or months! It won't make them soft. The longer you soak them, the more they release over a long period of time.

Amino Gels are available in powder form.

Moistened hook baits can be rolled in the powder and take it in immediately. Only when then put into the water, they will turn into a gel, making it slimy, releasing in a pulsating manner. That creates an explosion of taste and smell in the water.

Try it in a glass of water, to watch the effect!

# Carptrack Additives

to pimp boilies, boilie mixes, stick-mixes and pellets!

30 TIMES PIMP - FOR BIG ONES!

**PIMP YOUR BAITS,  
FEED LESS,  
CATCH MORE!**

Andreas Filusch: „Without my Cartrack additives, I don't go fishing! The bite rate, especially in difficult conditions, has increased enormously since I pimped my food afterwards!“

Since 15 years the Hit!

### inLiquid & Powder

Natural products with seductive powers. Targeted additions of L-Amino Acids for the highest possible stimulation, triggering Maillard Reaction for a unique aroma. 1 part inLiquid and 7 parts Powder build the fantastic Liquid Powder Paste to create yourself.

### Amino Complex Liquid & Powder

All Cartrack Additives, liquid or dry, combined to one Powder/Liquid. Strongest Amino Power, incomparable smell and taste at the highest solubility.

Pair for Big Ones

inP and you catch carp like never before!

GLM Fullfat, NR.1 attractor

### inP

Water soluble Powder Enhancer that signals food. Liver, lecithin and yeast give it a strong attraction. Well watersoluble, even in winter.

### GLM full fat blend (premium version)

Extremely stimulating and attractive to the carp. The difference to the fat-free, cheaper version is massive. Fat is one of the main taste carriers and makes our GLM full-fat blend taste and smell much more intense and more catchy! Try it!

### Pure Liver

High percentage of different amino acids, renowned for years as one of the best carp attractors. Very intense in taste and smell.

Evergreen: outdated or up to date?

Liquid Amino - bestseller!

### Liquid Amino - maybe the most attractiv additiv without changing the bas character of the bait!

Triggers a strong feeding stimulus. Subtle smell, maximum taste. **Ingredients:** Dissolved Betaine (N-Trimethylglycin), L-Methionine, L-Cysteine, L-Alanine, L-Arginine, L-Proline, L-Arginine, L-Tryptophan, Vitamin B6, Protein, Carbohydrates

### Intense Fish Oil

New! 50/50 blend of fish oil and salmon oil - even more Omega3 fatty acids, even more attraction! Pure, intense fishy taste, renowned as an instant attractor. Fish oil rises up and therefore attracts carp at all water levels. Bring the attraction up!

### NHDC Liquid - the original (natural sweetener)

1800 times sweeter than refined sugar, without turning bitter or tangy, unique in taste and the best sweetener for fishing! Extremely taste enhancing all other ingredients. Attention: pure NHDC is not water soluble. We have found a technic to make it soluble and sell it as a highly concentrated liquid. Compare and decide for the best.

### Pure Betaine

It was kept under wraps as a secret ingredient. High content of different amino acids. Intense unmistakable smell and taste.

Attention: pulls moisture and fish!

Andreas Filusch, cold east wind and nevertheless fish with LP paste!

## The most attractive carp bait ever!

### IB Cartrack Liquid-Powder Paste (ready to use in tub)

The famous IB Cartrack Additive inLiquid and Powder (page 18), when mixed to a ratio of 1 part liquid to 7 parts powder, make the renowned 'Liquid-Powder-Paste'. Many well-known anglers like to wrap this dough around their hook baits. They prepare the bait before their sessions and store the covered hook bait in a bag or a tub. To avoid sticking, the bait should be sprinkled with powder, GLM full-fat or other meals. That way you can preserve the hook baits for weeks even months!

The paste keeps its intense smell and releases the strong attractant over 10-50 hours.

After 1 hour in water

After 12 hours in water

After 16 hours in water

## Soil / Sand trick with Squid-Liver, Protein Concentrate and / or ADD FAT!

Jan Federmann swears by this tactic to create a quick bite. He mixes 20/80 additives with soil or sand and tilts the bucket at the spot. This creates an extreme cloud with incredible smell and taste underwater. Nearby fish will immediately notice!

Jan Federmann, has been fishing with IB for over 11 years and knows exactly why he does not want anything else!

# Three building blocks for successful carp baits

## IB Carptrack Squid-Liver Meal

The Carptrack Squid-Liver Meal Concentrate has high free amino acid content.

This very attractive boilie component is usually used as 10-25% of the boilie mix. It allows you to pimp even the most basic home mix.

It is very intense in taste and will give your recipe a convincing attraction in all conditions. **Carp love Squid-Liver, you can't use too much!**

1 kg Squid-Liver Flour	10,90 €
2,5 kg Squid-Liver Flour	26,90 €
10 kg Squid-Liver Flour	89,90 €

## IB Carptrack Protein Concentrate

High protein and lower ash content, whilst easily digestible. A big part of water soluble protein, excellent binding-, pelletiser- and extrusion-characteristics. Extremely stimulating effect on carp. Use 5-10% Protein Concentrate in your boilie mix. Carptrack Protein Boilie Concentrate is a vital ingredient in all Carptrack Boilie mixes.

**Successful anglers across Europe trust this product - because it works!**

1 kg Protein Concentrate	6,90 €
2,5 kg Protein Concentrate	15,90 €
10 kg Protein Concentrate	49,90 €

## IB Carptrack ADD FAT

Fat is the number one carrier of taste. Add Fat is based on a special fish meal and contains aromas which provide a unique and strong meaty flavour.

Round up your own boilie mix or ground bait with Add Fat and intensify your flavours. Fat is one of the most important energy sources and also a carrier of Vitamins like A, D and E. We recommend a dosage of 5 - 25% in the boilie mix.

**Fat carp love fat!**

1 kg ADD FAT	6,90 €
3 kg ADD FAT	14,90 €
10 kg ADD FAT	39,90 €

# Imperial Baits - Pimp my Bait

## The soil/sand tip

Mix IB Carptrack ADD FAT, Squid Liver and/or Protein Concentrate (30%) with soil or sand. This creates under water a very attractive and seductive cloud. In addition Carptrack additives like inLiquid / inP or GLM enhance the attraction of this explosive mix even further.

## Introduction

Especially in times of high angling pressure or slack periods due to weather conditions, it is more important than ever to introduce extremely attractive and not too satiating food, to provide a dissolved trace as a feeding trigger. The wide range of IB Carptrack Additives gives you a comprehensive repertoire at the water, to achieve every time the absolute maximum on your chase for the big carp!

## The advantages at a glance

- Less feeding needed, as each bait disperses more attraction
- Less risk of over-feeding
- Initial and prolonged attraction in the water
- Due to less food, the fish is quicker at the hook bait

Max Nollert, 24.6 Kilo Rhone Power with pimped IB Carptrack CRAWFISH black & white boilies!

**We don't want you to spend more!  
We want you to catch more!**

Reduce the amount you feed by the cost of the enhancement, you can afford it!

## What is a 10, 20 or 30 TIMES PIMP?

With a mixing ratio of, for example, 30g of a powder and 30ml of a liquid additive, you get the perfect, renowned Carptrack crust, without your bait becoming sticky. Solid for the launcher after a few hours of drying!

**Notice:** Leave the top off whilst drying!

## Carptrack GLM full-fat blend

There aren't enough words to describe the energetic taste difference between GLM full-fat blend and other de-fatted variations of GLM available in the market. Oils and fat are the main flavour carriers of solid food, which you still get from our full-fat. Ordinary, de-fatted GLM enters the fishing- and angling industry as a waste product. Not at Imperial Baits! We have produced a 50/50 blend, which perfectly combines the advantages of water solubility, as well as the taste potential through fat and oil. Carptrack GLM is an important ingredient in some of the boilies in our range, but we also still use it to further pimp the surface of the baits. The effect on the carp is very special, even when sparingly (5-30 g/kg) used. In addition with other Carptrack Additives, the already strong attraction can be enhanced even further. Combine it with Liquid Amino and...!

## Which Carptrack Additive matches which boilie type?

Due to the savoury, very strong smell and taste of Carptrack inLiquid and Powder, these are the perfect addition for stinky boilies. Both components adhere very well to the boilie and work for a long time under water. Remember to add the powder first and only after mixing them up for the first time, to then add the liquid component. That guarantees a perfect distribution.

The scent of Carptrack Liquid Amino and inP doesn't quite come across as tasty banana or strawberry, but this Additive creates a highly attractive composition with our sweet boilies. A little bit like the salt in your soup! These water solubles also work in waters, where the stinkers don't do the job. Especially in winter, you should favour Liquid Amino & inP and then, obviously due to their high water solubility, also on the stinkers.

Both options can be enhanced to own taste with GLM full-fat blend, NHDC, Pure Betain, Pure Liver or Intense Fish Oil.

**PIMP WINS!**

## Carp like it sweet!

NHDC is 1800 times sweeter than sugar, without being bitter or sharp. An additive that we recommend for all pimp variations, no matter if fishy or fruity. 3-7 ml / kg are more than enough. Use it to enrich for example Liquid Amino or Carptrack inLiquid and then add it to your bait. NDHC acts as a flavour enhancer for all ingredients and result in significantly more fish.

## iBox 12,5 Litre & iBox the Big One 30 Litre

Practical with many uses, very secure closure which keeps out water and keeps scents in. Can be used for clothing, food, carp sack or sling, small tackle, or for the classic transport of bait. Made from nylon reinforced plastic, freezer safe, very strong, and great use of space. Additional insert (7 Litre) with the iBox 30 Litre, for small items, Carptrack Additive, Dips and Gels or for the mixing of stick mixes.

# Max Nollert Temptation MK III

## Part Duplon or full cork handle

### Max Nollert Temptation MK3 12ft 2,75-3,25lb

The third generation of this well established and extremely popular bestseller made of IM7 woven Carbon. 2,75 - 3,25lb in one rod.

#### Specifications:

- IM7 woven carbon
- Polished, with a clear varnish finish
- Casting weight 80-200g, max 250g with a pendulum cast
- 6 + 1 SIC rings

#### Characteristics:

Epoxy varnish from guide ring to about 1cm before the slip over connection. The rod has a sensitive tip and a strong, dynamic spine.  
Extremely long pull, great to remain tension, even during quick and abrupt direction change of the carp or in rough waters when drilling from the boat or bank.

Temptation MK3 12ft 2,75-3,25lb - Part Duplon	229 €
Temptation MK3 12ft 2,75-3,25lb - full cork handle	249 €

# Max Nollert Temptation Ten

## 10 feet and full cork handle

### The new Max Nollert Temptation Ten - 10ft/3lb - Feel the fish!

Compact, light, balanced quick reaction and sensitive

#### Designed and developed for...

...the modern cap angler, when using an inflatable boat, to place the rods and/or for drilling from the boat. The brand new rod by Max Nollert is also great for overgrown spots and stalking, fishing between the trees.

#### Specifications:

- Only 295g and perfectly balanced
- Quick, reactive parabolic action
- Material: IM7 Woven Carbon, polished and clear varnished.  
For the tip section, as custom with the Temptation since 2002, we use a finer woven structure for more sensitivity.
- New ring style: BKWAG 'double foot', specifically formed to prevent tangling whilst casting.
- 6 + 1 SIC rings in the following sizes: 30-25-20-16-12-10-10
- Extra tight reel seat due to RAMBO size 18 reel holder, black edition
- Classic full cork handle, extremely stylish, slightly narrowing towards the butt, for the perfect grip.
- Orange ornamental thread
- Finish: Metal cap with beautifully engraved IB logo.

Temptation Ten 10ft 3lb - full cork handle	229 €

**A MATTER OF HONOR:  
STEEL OR STAINLESS  
STEEL?**

**IN HAPPY EXPECTATION!**

Great variability,  
now also in the  
buzzer bars

**YouTube Video online: IF Combi Carpo G2  
- the best Rod pod ever?**

## IF Combi Carpo G2

The new version of the bestselling rod pod „Combi Carpo“!  
Only at Imperial Fishing with the curved buzzer bars!

### Stainless steel, or steel?

While the stainless steel has a clear optical shine, the steel version with its powder coating in a decent green tone fits in with the natural environment.

**THE STEEL VERSION IN NATURE-FRIENDLY GREEN.**

The Combi Carpo held the rods tight on the bank of the Mosel river when the strong fish pulled against the tight drag.

**There is hardly any rod pod that is more versatile than the Combi Carpo and on all types of waters with 2, 3, or 4 rods! For that reason the Combi Carpo is our first choice.**

The Combi Carpo has a small pack up size, a fast build up time, it is highly stable, and has great functionality. No matter if you fish with 2, 3, or 4 rods you are always looking good on the water, and with the adapter you can mount the pod on the transom and you have an awesome boat pod. The upper portion (the seesaw) can be individually adjusted in its angle. The adjustment from waters surface to a high pod can be done in seconds. Nothing is worse than poking around with bank sticks trying to find a decent hold. The three legs of the Combi hold everywhere, even on steep ledges!

### The Combi Carpo and its dream measurements of 90/60/90

90: The tripod from Combi Carpo is delivered with 50cm extension legs.

In its built up position you come to 90cm leg length.

60: That is the height off the ground of the tripod without the seesaw attached.

90: The seesaw with the height adjustable buzzer bars and the mounted bite alarms come to a height of 90cm. New version G2 even 100 cm!!

Telescoping 4er buzzer  
bars in the front!

### What has changed on the new model?

The main thing in „what is different“ is that there are no longer these arches in the front and back. These took up a lot of room in storage and as seen in the photos they are divided. The buzzer bars holder (the tubes) are a bit longer and lay flat later in the bag which comes in delivery. So in the end we have a slimmer pack size and a higher versatility when adjusting the buzzer bars in height.

**In the end there is to say: Amiaud Combi Carpo G2 is a thousand time proven system and now it is even better.**

IF Combi Carpo G2 - INOX	649 €
IF Combi Carpo G2 - STAHL / grün	395 €

When wanted it can be  
set up man high, perfect  
for deep water in front  
of the reeds.

**COMBI CARPO  
- NOW EVEN MORE  
VERSATILE!**

No matter where, no  
matter how, the Combi  
Carpo can!

# Adventure carpfishing from the boat - a November session!

Beginning of November. It's been fall for a while already in Germany. Once again this meant off to France – the carp were waiting! If it was so easy that the carp were waiting with open mouths at a free fishing spot and all we had to do was place the rig in order to be successful. As we know it is not quite so easy – and that is good! It would be way too boring and the phrase “business before pleasure” is very true. This also applies to carp fishing and nobody will deny that.

Magic Moments, with René Rex

## Boot ahoi

20 years ago I started fishing for carp from a stationary boat. No comfort back then, but success proved me right. The first thing we did for our trip was to adjust our material to the local conditions. Since it was to be a boat trip we fitted the Amiaud Rod Pods with the appropriate mounting to fit the back of the boat. In summer I had a saddler build a practical tent for the boat which should give us shelter during bad conditions. We also packed our tent heater with thermostat because a little comfort can be very useful during the hunt for big carp. Braided lines made of 0,20 Visible Touch and 30er Snaggy Water in yellow as well as thick mono shock leader up to 0,70 mm made their way into our tackle box.

Various safety clips, different heavy leads up to 240g should help us to adapt in the best way in many situations. On this trip we put all our eggs in one basket when it came to choice of bait – and the basket was called CRAWFISH! Besides many top water-soluble ingredients which had shown in the past how successful they are- we counted on the 27% crawfish meal which made this boilie especially attractive.

Off we went and the nightly trip was stress free as usual because traffic on the French highways simply flows at his time of “day” and year. As the sun was high up in the sky the next day the boat was completely loaded in the water and we began the search for our first spot. We attached the boat to a metal wall and we had a good feeling as long as no strong breeze or storm would hit us from starboard. Due to our position we were able to fish two areas of this canal-lake complex at the same time. In tow line we had two rubber boats. One was 2,60 m long with a 4 PS outboard motor, the other one was 2,10 m and had a strong electrical motor and a close to five kg very long lasting lithium-ion battery. As we expected catfish in the canal and there was a strong current during the week we put the bigger boat behind the metal wall in the canal. We explored the area with the echo sounder but couldn't find any special hot spots so we continued driving along the metal wall up the channel staying in the lake. Here the echo sounder showed us the spots we were looking for. A rise in the river bed, an accumulation of debris that had collected in the 4 m deep water as well as an especially distinct edge gave us confidence to place our rigs.

We had coated the outside of our bait at home with frequently tested additives and were now able to use dry bait with highly soluble attracting effects. In the lake we were looking for gaps in the weeds that were preferably close to thick weed beds. Water plants and vegetation have a magical attraction on carp, big open areas are often less productive.

Right or left, which side brings?

The fog - the return!

It was already dark when I put my last rig in the water and the small light of the tent showed me the way back to the boat. It was a good feeling to switch into waiting mode after a good day's work and relax with a cup of best coffee with a shot of Bailey's.

We had a five kg gas bottle for the week and saw no reason not to attach it to the small tent heater and fire it up. Although there was summer weather during the day it was impressive how much and how fast it cooled down as soon as the sun disappeared on the horizon. Within 10 minutes it was hoodie and jacket time. Just as fast as we had put them on we were able to take them off when we turned on the heater.

## It splashed in the channel

We were just enjoying our first sip when it splashed in the channel not far from our boat. They were here! Soon after the first 12 kg mirror carp slid over the edge of my net. One or two photos and the nightly visitor slid back into the water. Fog came up and we could feel the moistness. Inside the tent we were feeling good. We were already in our sleeping bags when Rene's bite alarm started a slow song. Shortly there-after Rene disappeared into the fog. The bite was in the lake and we had good reasons to hope that it would be a bigger fish. It was an 18.5 kg common and therefore a top start.

By the next morning I had left another mirror carp of about the same size as the first behind without a photo. Another bite I was not able to land because a sharp edge had cut the 0,70 line. The next night began.

## Big carp on the line?

And then it happened. A perfect run and the reel was spinning. I stepped into the rubber boat, started the engine and followed the fish. It pulled down the river and when I was close to him-thanks to the gas engine, I shut it off. The rod bowed deep into the water in front of me and that's how I waited for quite a while until I started getting doubts if it was really a carp that I had hooked. I was wishing so bad that the jerky moves which indicate a catfish drill wouldn't show up and to my surprise I wasn't able to detect any.

But it stayed so deep and quiet that it had to be a 30 or 35 kg fish. We went down the river further and further. The light of the boat that Rene had switched on at my departure was hardly visible any more. I didn't want to force the drill any longer because I still wasn't sure that it was a carp. So I continued drilling hoping for a big carp. The minutes were passing and the opponent was getting tired and slowly came to the surface. I was so curious what I would see any second but it kept me tantalized and went down deeper once gain. The drill had been going on for so long that without seeing the fish I didn't think any more it would be a carp. Bubbles came to the surface, the fish followed and yes – it was a catfish. I applied a lot of pressure and shortly after the fish was in my boat. Compared to the catfish that we had caught on the Rhine during the summer this one was not all that big but the stretch that I had to drive with my small gas fueled boat against the current was much, much bigger. Rene had already expected a catfish although he still had hope that I would come back with a huge carp. We took photos, I put the rod back into the water and threw a handful of boilies in right behind it with the picture in my mind of the catfish at the bottom of the canal who would soon suck them in – some more handfuls followed. Back in the tent I

Quite untypical but exciting: for a long time it was not clear if it was a carp or a catfish. I drove at least 3 km down the river!

warmed up and told Rene about the feelings I had during the drill. At some point during the night another bite came on the same rod and shortly after I was in the same situation again. This time I sped up the drill sooner and the jerky moves of the catfish were triggered. This catfish was a little smaller, I set it free right away, put the rod back in, fed a little and imagined once more how the boilies would disappear in the catfish's mouth. I wished I had a boilie that catfish don't like and carp love – and maybe someday – with a little luck – I will find the recipe for such a boilie. Most of the time a little less food helps, but you always need a little bit of fishing time on the spot to find the right strategy. The rest of the night and the following morning didn't produce a single usable bite. No matter in which water you fish, usually the morning before 10 or 11 a.m. always brings a fish. Sometimes even a special one. But not today.

## The Move

We decided to head to a different spot. Boat fishing makes moving especially nice and easy. Rods in, cast off, and away you go. We fished a different place in the lake for two days where we could only catch one more middle sized carp and then we moved out on the lake and down the canal. We reached a wide spot with huge trees laying in the water on the right side of the area, a clear hot spot, because the water depth of 2,5-4,5 m around the trees. This was ideal.

First we attached our boat upstream of the trees, then we sat in the small iBOAT and drove over to the trees with smooth paddle strokes, slowly and soundless. Rene spotted her first and before I could turn around she had disappeared. It was carp around 20 kilo which felt safe in the trees. The plan was now to get that carp as safe as possible onto the hook and into the net. We checked the area and positions of the trees more detailed and decided it would be strategically best to place the boat on the other side downstream of the trees.

Only 20-25 m away we attached the boat and placed our rigs on small sandy areas within the weed bed just before the trees. Of course we used our thickest lines and strongest hooks and fastened our drag to the limit. A tug test we conducted on the line from within the boat ensured us that even during the strongest run the rods would remain safely on the rodpod. A freshly hooked carp would have to move to the left or to the right in order to follow its flight instinct. We set the swingers tight on the edge of the blank to ensure there was no free line.

...over the moon!

The deadwood was alive and kicking!

## The Take

It was not until 11:00 a.m. the next morning when Rene's bite alarm went off. Rene, who was in his open sleeping bag with his shoes on was up right away. Rene was able to apply a lot of pressure with the Temptation and was still flexible enough to reduce a slitting of the hook to a minimum. It was beautiful to watch how the rod bowed and the carp had to move to the left and to the right just as we had planned. Rene gained more and more line. As long as the carp cannot speed up during the drill chances are good. This is one of the most important factors when drilling in front of obstacles. The right equipment and the right drill tactics make the difference. When the danger of the trees was gone Rene jumped into the small boat and drove out on the open water. I followed him with the camera and was able to film the beautiful boat drill of the 19,7 kg mirror carp. Rene's estimation of the fish weight had been correct. Besides the rods at the woods we had placed more downstream near the shore because there were fields of water plants and it seemed likely that the carp would be there to feed. Close to 21:00 came the first bite on a deeper rod. But as soon as we picked up the rod it seemed clear that it was no carp. A big chub had liked our crawfish boilies. The nights in winter after the clocks have been changed are long and while it is very comfortable in the tent it is also nice when there is something to do.

## Amusement and ..... BAM!

Watching DVDs while fishing is not our thing. The newspapers we had brought were already read and that was when I had the idea to start the good old Backgammon which I had loaded on my Ipad recently. An amusing game with nice battle effect made the time to the next bite pass quickly. All of a sudden I was standing in the back of the boat with a bent rod in the middle of the night. The bite had happened in free water and I just wanted to enter the rubber boat when the fish turned all of a sudden and raced towards me with high speed. I had no other choice than reeling up the line as fast as possible in order to keep up the pressure. He seemed to know exactly what he was doing and when he was only 5 m away from the back of the boat I jumped into the inflatable

to have a better chance to lead the fish that was darting underneath the main boat. It was swimming directly towards the engine, I pushed the rod halfway into the water to avoid contact with the propeller and asked Rene to bring up the engine as fast as possible. I was afraid the line had been caught in the propeller already when Rene gave a thumbs up when he saw the line in about 1 m depth passing our anchor rod. I couldn't and wasn't allowed to put up any more pressure and had to rely on Rene, who had the line in his hands in the meantime and stayed calm. The fish had swam already underneath the fiberglass boat and was already on its way to the woods upstream of us, at the same time it was losing power. Rene realized that and led the fish gently on the line over his hand. I could only watch from the other side. Rene got into the second inflatable which was still attached tightly to the base boat and that made it easier for him to keep the fish away from the anchor rod and the single tree trunk at the front of our boat where we had attached a rope. On this "half tennis court" there were three critical areas where the carp shouldn't be allowed to flee- by any means.

### Played by hand

Over 15 years ago we had drilled many fish that had fled into the deep reed at the Lac Du Der. During these drills back then it was a usual thing once we got to the reed to cut off the 20 meters of thick mono shock leader, put on our wading pants, follow the fish into the reed and drill it on free line with our hands. It was not a very nice thing but it was different and successful. If you know that the pressure we have to put on a carp rod in caution during a drill rarely exceeds two kg (it's even closer to one kg) then you can imagine that feeling is much more important than strength during a hand drill. It would be easy to tug on the line with five or more kg. Anyone who is not aware of this relation might end up with an empty line after his first hand drill. The fish had gotten tired in the meantime. I was still in the rubber boat on the opposite side with my rod and couldn't do much more than hope that Rene was doing the right thing.

"This one is smaller than mine" Rene called as he prepared me - as he would tell me later - for an eventual loss. Because when the fish had surfaced for the first time he had seen very well that this fish was a real showpiece. The fish was now right next to Rene's rubber boat when he put the net into the water. With highly raised arm and the line in his hand Rene put the net under the fish - it was caught. I turned around and looked at "my" fish, thanked and congratulated Rene for his actions. The scale showed a great 24.6 kg - everything was good, very good. Photo, photo, and back. That is our carp luck.

### One more?

I was in the lead in Backgammon on our last night when Rene got a bite in the free water and when he got to his rod he had nothing but loose line. What had happened? Only 5 m of line was hanging off the rod which gave us the impression that the line had broken on the surface without any nearby obstacles. We speculated that maybe a pike had swam into the line with an open mouth or that the line had been damaged through contact with the engine propeller during the trip. There was no other explanation. In addition a barb had bit on that pole earlier and we took comfort in the thought that it had been another barb. Rene didn't want to give up in Backgammon and so we kept playing until late in the night. The next morning Rene was woken up by the nicest alarm clock possible. And it was another fight at the tree field which Rene was able to win in a convincing way. Carp in the 15 kilo weight class are often very fierce fighters just like this scaled carp which was also our last fish of this November trip.

Like in a picture book!

no words

Stunning carp after a hard fight!

The big one of the session!

### And again no late fall trip

The weather was different from what we are used to in late fall. During past years I had been disappointed by our October trips which seemed like summer trips. The change of the climate is very visible. What seems to be an advantage for us carp anglers is that longer vegetation periods mean a longer feeding period for carp. In addition, the stocking measures like the Romanian breed carp at Lac Du Der lead to monster carp of 90 german pounds. For our earth the change of climate is unfortunately an increasingly frightening situation. Through global warming melting pole caps will provide not only our Dutch friends with wet feet, but also the cutting down of the rain forests diminishes the particles in the air above the forests which rain drops want to coagulate with. Therefore the flow of billions of cubic meters of water above the rain forest gets smaller and our green lung gets weaker. The forests need the rain and the rain also needs the forest - that's the latest findings.

There are two sides to each coin. There will be a 50 kilo carp at some point, let's hope that the earth can find a good possibility to combine big carp with a healthy environment and nature!

In this spirit, good luck and tight lines! *max nollert*

24,6 kg caught on IB Captrack CRAWFISH black & white boilies

We love to fish!

TR-MN 4 FOR THE BIG FIGHT! www.tech...strat.de techno

# SUPERIOR BRAIDED MAINLINES

## Visible or Invisible Touch – which one?

0,17mm with 15,4kg, or for the hard-core session use 0,30mm (Snaggy Water) with 21kg upper limit! Easily visible bright yellow or unobtrusive grey, that is a matter of personal taste. These lines are incredibly strong. UV light resistant which give them a long life expectancy (up to 10 years).

They have a neutral sinking character, surface sealing, allow extremely long casts and are non-tangle.

**Knife test:** withstands 40-60 passes over the blade, where a standard mono only manages 10.

300 m 0,17 mm or 0,30 mm	33,00 €
600 m 0,17 mm or 0,30 mm	66,00 €
900 m 0,17 mm or 0,30 mm	99,00 €
1200 m 0,17 mm or 0,30 mm	132,00 €
1500 m 0,17 mm or 0,30 mm	165,00 €
1800 m 0,17 mm or 0,30 mm	198,00 €

## Braided lines for long-distance!

Maïke Prinz loves her natural lakes in Mecklenburg Germany. There it is often the case that she needs to place her baits hundreds of meters from shore. When there is a lot of line on the reel, and you need to have good bite indication at distance the 0,17mm braided line is the way to go.

## Advantages of Visible and Invisible Touch

**From the boat:** In order to avoid line contact with driftwood and other obstacles, hold the tip under the surface when driving back from the spot. That way the line stays under the water, where it will remain due to its denseness.

**From the bank:** When casting out your rod, we recommend a led, which will pull the line to about 0,5 – 1m depth. Drop leads with a line connection to the shore are perfectly suited.

**SHOCK IT:** For both options there should be a monofile shock on the end, which will sink unobtrusively to the ground and provide distension to your complete line set up.amount of stretch.

This perfect placement of your lines between the surface and obstacles on the ground is only possible with the neutral sinking behaviour of the Invisible / Visible Touch!

### The unbelievable knife test on YouTube

The Invisible / Visible Touch lasts up to 50 – 60 runs across the blade, where a 40 Mono over the same blade lasts only 10.

### Neutral sinking behaviour

The Invisible / Visible Touch remains at the level, where the angler placed it.

YouTube search: Imperial Fishing Visible Touch

TOP  
from 900 m  
**FREE 100 m  
SHOCK IT**  
(mono shock  
leader)

**Best prices**

300 m = 33,00 €
600 m = 66,00 €
<b>900 m = 99,00 € + 1 x SHOCK IT</b>
1200 m = 132,00 € "
1500 m = 165,00 € "
<b>1800 m = 198,00 € + 2 x SHOCK IT</b>

### TIP: SHOCK IT!

The last 15 – 30m should be a monofile shock lead in a 0,50 – 0,70mm strength. It sinks, is almost invisible and extremely abrasion resistant, whilst providing distension on the final drill. Tried and tested 100.000!

### Shock 'it – Monofile Shocklead

Extremely abrasion resistant, high knot strength, great casting characteristics, amazing distension, subtle colour, ideal in combination with our braided lines.

Shock'it 0,50 / 0,60 / 0,70 mm 8,90 €

## Secure spot indication with the buoyant marker poles

### Imperial Fishing marker float 6,5m long, incl. 1,5kg weight and bag

Due to the powerful reflector foil at the tip of the float, you'll be able to view the IF marker float from up to 220m with a standard head torch. Manufactured to the highest standard. So far no breakage has occurred during average usage.

The marker poles can be adjusted up to 50cm of the water depth and is also a great tool to feel the ground. Especially in windy conditions, the IB Marker poles makes precise placement and feeding on the spot much easier, even in flowing waters.

Location: Lac du Der-Chantecoq, Photo Max Nollert

IF buoyant marker pole 6,5 m long incl. 1,5 kg weight & bag	69,90 €
IF buoyant marker pole extension part 1 meter	7,90 €
IF marker sticklights - yellow / red / green / blue	24,90 €

## iRock - „more fish, more sportive, more gentle!”

iRock Gripper - 80 g / 1 piece	1,60 €
iRock Gripper - 100 g / 1 piece	1,90 €
iRock Gripper - 120 g / 1 piece	2,10 €
iRock Gripper - 140 g / 1 piece	2,25 €
iRock Gripper - 160 g / 1 piece	2,40 €
iRock Gripper - 180 g / 1 piece	2,50 €
iRock Gripper - 200 g / 1 piece	2,50 €
iRock Gripper - 250 g / 1 piece	3,10 €
iRock Gripper - 300 g / 1 piece	3,40 €

### Gripper 80 - 300g

- High density mix, with Magnetite content (naturally derived - lifetime corrosion-free!)
- Almost twice as heavy as stone-'leads' with swivel
- Significantly smaller volume than lead-free weights from other manufacturers
- Less sinkage into sludge
- Quicker to retrieve from the ground, less risk of hanging
- More grip, due to bigger surface space
- Improved hooking, due to larger surface space
- Minimised ascend risk (due to bigger volume, more water resistance, follows the carp more smoothly)
- Absorbs aroma (for example Flavours, Dips, Gels) and releases them slowly
- Sinks slower and with less impact to the ground, compared to other weights
- Doesn't require coating, which could come off at ground contact
- If they can, the iRocks are not detectable by carp!!
- Environmentally friendly - non-toxic! No lead, no wolfram!

iRock offers many technical advantages for the utmost success in fishing and are in addition completely harmless for our environment. For the first time environmental awareness is even a bit cheaper than pollution!

**iRocks can also be dipped**, as they have been developed to be able to absorb aroma. Even though it may sound a bit strange, but it's already a trend in other angling disciplines for a while.

We can promise you this; it will be a hot topic now and even more in future.

### Note:

iRock has a slightly higher resistance when long-range casting. Due to its qualities, you can then use lighter iRocks. iRock Inline long-range options, also under 100 g, are with UFO sinker in development.

Returning is always just a short break from our next great adventure.

Matteo Painsi, 2016

iRocks can easily be retrieved with a magnet on a string or pole. This is due to the corrosion-free Magnetite.

## Terminal Tackle we can trust!

At [www.carprus.de](http://www.carprus.de) you can find the entire range of our selected terminal tackle, which has been used for decades across all of Europe. In this catalogue we present you with our TOP TEN Carp'R'Us products. We trust they will help you land your dream carp safely.

### Centurion 2000 ATS

The Centurion 2000 ATS has been developed for extreme conditions, for example fishing with a locked break in front of and behind obstacles. There is no known case of an up bend Centurion 2000. This and the Continental Snag Hook are the only ones in the Carp'R'Us Range with a straight hook tip and without bent hook ear. We created an ultra-strong hook hold. For the best hook characteristics we use the 'Mouthsnagger' in addition.

10 pcs. Carp'R'Us Centurion 2000 ATS - size 2, 4, 6, 8 5,99 €

## A NEW HOOK IN OUR RANGE

MADE BY CARP'R'US

### Brand new forged: the Carp'R'Us Predator ATS!

- made of the strongest Japanese steel!
- patented curing process!
- matt, corrosion resistant coating!
- NO Teflon = NO bend!

CARP'R'US

# PREDATOR

### Details about the new Predator ATS:

The shank runs out from a straight eye. The point is a bit longer than the other CRU hook models and has a micro barb. The smaller barb ensures a good hook up in the carp's lip. Like all Carp'R'Us hooks the Predator is made from the best Japanese hook manufacturer and uses only the strongest Japanese steel. The hooks are hardened with a Carp'R'Us patented method so that they are very strong and maintain a long lasting sharp hook point. The new ATS coating which does not include Teflon ensures that there is no corrosion, and unlike Teflon this coating will not affect the hook and lead to failure through opening.

### Continental Snag Hook ATS

An extended version of the original Centurion 2000!  
The hook shank was minimally extended. The 'Flip & Turn' effect in combination with a 'Mouthsnagger' is surprisingly good.  
Even if you fish with stiffer materials like mono- or fluorocarbon, it will still turn swiftly in the lower lip.  
An ideal weapon for big carp in tough conditions and extremely obstructive areas. We caught in the past catfish over 2 meters with no hooks bent or broken.  
**- Fighting metal!**

10 pcs. Carp'R'Us Continental Snag Hook ATS - size 2, 4, 6 5,99 €

Daniel Trocha, Danube Big One with Carp'R'Us Strip-X, Centurion 2000 size 4 and Mouthsnagger red!

### Gizmo Swivels

A specially developed quick-change system for hook leaders, which fits into all common Lead Clips and Inline Leads.  
Gizmo Quick Change Swivels allow a quick separation between mainline and rig, without having to tie or release a knot. No additional rubber protection over the swivel required. Your rig sits securely, even during the most turbulent drill.

8 pcs. Gizmo Swivels - size 8 5,39 €  
8 pcs. Gizmo Swivels - size 11 5,39 €

### Antitangle Sleeves

The Anti Tangle Sleeves are extremely versatile. We recommend them in combination with the Gizmo Quick Change Swivel – they are a perfect match.  
Ideal for the prevention of tangled Soft- or extra-long Combi-Rigs.  
Carp'R'Us Antitangle Sleeves are extremely tear-resistant and stretchy.

15 pcs. Anti tangle Sleeves 4,79 €

### Bead & Ring Kit

The Bead & Ring Kit was specifically developed for the use of Sliding Ring Rigs or the 360° Rig. The pearls are made of a special material, which sits extra tightly on the hook shank. They are also great for a flexible boilie hair position. Easy to attach and transparent.

For power-casting also available in the 'Long Distance' version!

Bead & Ring Kit (20 pearls, 10 rings) 5,19 €  
Bead & Ring Kit Long Distance (12 pearls, 6 rings) 5,19 €

### Snag Clip / Lead Clip / Safety Clip

You have the control over three different settings, to which resistance the weight should be released. It is the only clip that allows the fish to drop everything but the hook-link in case of a line breakage. You can find the video explaining in our online shop. Perfect for long distance fishing. Can be safely used with Leadcore, Monocarbon, Fluorocarbon and braided lines.

6 pcs. Snag Clip weed 6,49 € 6 pcs. Snag Clip silt 6,49 €

# Tiny worms – huge effect!

8 pcs. Mouthsnagger Standard / Shorty 4,99 €

### Mouthsnagger – available in 2 sizes and 5 colours

The original, patented Carp'R'Us Mouthsnagger conquered the market as a simple replacement for a shrink tube with the 'Line-Aligner' bait presentation.  
The Mouthsnagger improves the turning qualities of the hook and minimises the risk of a blow-out.  
They improve the hook efficiency and will give you more hooked fish.  
The Mouthsnagger can be used with all common carp hook models.  
Once the hook is blunt, the Mouthsnagger can easily be pulled off and be re-used.  
**Mouthsnagger and the hook it set!**

Colours: black, clear, green, brown or the special edition 'Maggot Mouthsnagger Red'

## Combi rigs made of Fluorocarbon or Strip-X are his favourites!

Jan Federmann with golden common in the morning

### Clearwater Fluorocarbon Trace

The Clearwater Fluorocarbon is absolutely invisible under water and sinks like a stone, making no further lead necessary. Touch it, tie it, just try it and you will see that Clearwater Fluorocarbon is a truly unique trace. Perfect knot strength, rip- and abrasion resistant and tiny extension. Perfectly suited for Anti Tangle Stiff Rigs and everywhere, where you want to avoid snagging, like on the river, locations with high whitefish or crab population or to put down in great depth from the boat.

Carp'R'Us Clearwater Fluorocarbon 15 lb / 20 m	12,90 €
Carp'R'Us Clearwater Fluorocarbon 25 lb / 20 m	13,90 €
Carp'R'Us Clearwater Fluorocarbon 50 lb / 20 m	25,60 €

### Coated rig material Strip-X

Strip-X gained massive popularity over the last years through its fantastic knot- and abrasion strength. The special feature is not only the extremely strong core, made of special Aerospace Dyneema-Fibre, but also the especially robust outer skin, which won't snap, even when under the heaviest tension. The matt-brown colour allows a discreet bait presentation on almost all kind of ground surface. We especially recommend it for combi-rigs or stiff rigs.

Carp'R'Us Strip-X 15 lb / 20 m	17,99 €
Carp'R'Us Strip-X 25 lb / 20 m	17,99 €
Carp'R'Us Strip-X 45 lb / 20 m	17,99 €

### Clearwater Fluorocarbon ready Stiff Links

The stiff Fluorocarbon Links have been developed for the use of combi rig presentations. The stiff part ensures that the bait sits far away from the lead and not on it. Fluorocarbon is completely invisible on the ground and therefore has a great advantage to regular lead materials. The taped loops on the respective ends have been exclusively manufactured for Carp'R'Us and are stronger than any knot. The ring on one end is designed for the quick attachment of Gizmo Quick Change Swivel.

STIFF LINK 16,5 cm 30 lb or 50 lb - (3 pcs.)	6,49 €
STIFF LINK 9,5 cm 30 lb or 50 lb - (3 pcs.)	6,49 €

Additional Stiff Links, Leaders and Ready Rigs are available online

Small details with big effect!

## NEW 2018: iBoat 500

Max Comfort / Integrale / PLUS – the new dimension for boatfishing!

### Comfort measurements: 5,0 X 2,2 Meters!

#### Advantages over a hard bottom (fiberglass, alu) boat:

- Comfortable boat angling at a small price
- No trailer or covered storage place needed
- No extra trailer license needed like with hard bottom boat
- Small pack size (see photo) fits in every estate wagon with tackle
- With 14 attached D-rings it is perfectly designed to fit the Black Cat Cave Boat tent
- Another 7 D-rings for the attachment of anchor ropes
- Optional integrated double bed system with room to pass through the middle
- Enough storage room and comfortable enough for two to fish more than a few nights
- Large standard equipment package as with all iBoats

### Something special:

For the first time it is possible to have a bed system where you are laying along side another as in a large fiberglass boat. And when there is a bite you can manage to get to the front or the back of the boat without tripping or climbing over something. All that in a weather proof tent with enough room that you can fish over a longer time in a relaxing and comfortable manner.

### Dimensions of the bedsystem

L 200cm, W 60cm, H 46cm  
Distance between bed left and right: 36cm

### Black Cat Cave 2.0 Boatbivvy

The iBoat 500 is perfect adapted to the anchoring points of the tent.

Through a self-inflatable mat and the transition to the tube, you come to a proud 70-80cm lying width!

Inox Clicksystem!

### Weight complete V2 ca. 155 kg

Max load: 1250 kg    Max motor weight: 105 kg  
Max hp: 40    Max passengers: 8 + 2

V1 iBoat 500 Max Comfort = complete boat including large accessory packet	2490 €
V2 iBoat 500 Max Comfort Integrale = V1 and double bed system	2790 €
V3 iBoat 500 Max Comfort Integrale PLUS = V1 + V2 + boat tent Black Cat Cave 2.0	2999 €

### Included in delivery:

- high quality aluminum floor
- Large protection strips on the areas where they are needed
- high pressure air pump with manometer
- high quality rip proof transport bag with folding design
- Stainless steel D-rings with many functions to include tent anchoring
- 3 times carrying handles on each side as well as 2 on the front and on the back
- Owners manual
- Quick start guide
- Repair kit to include patch material, valve key, manometer, replacement valve
- iBoat cover with rope tightening system to cover the entire boat

Adapted but still variable!

# iBoat Features Overview

More inside space than in other inflatable boats - please look for yourself!

iBoat 210 inside space: 1,26 m<sup>2</sup>

iBoat 260 inside space: 1,55 m<sup>2</sup>

iBoat 320 inside space: 2,06 m<sup>2</sup>

iBoat 400 inside space: 3,00 m<sup>2</sup>

## EXAMPLE iBOAT 320

Wide pattern for more inside space toward the bow.

High-tech PVC material (Dectix)  
- Colour green 0,9mm thickness  
- Colour reatree 1,0mm thickness

No unnecessary coaming

Feather light, rock solid high pressure floor up to 0,8 bar

38cm tube diameter for more inner space

Black aluminium seat with detachable seat cushion

Continuous sliding system for the seats

Oarlocks perfectly placed for an even distribution of the angler's weight, which allows maximum rowing speed.

Optimal paddle length and paddle distribution for the maximum thrust, leverage and leg room.

Re-set transom for more inner space length

Strategically placed, comfortable and strongly taped carry straps, which won't catch the line.

No centralised plugs, angle moved toward surface, to allow even more stability.

- iBoat Engineering - own development!
- 5 years warranty on boat skin & attachments!
- High tech PVC material (Dectix 1100)!
- Steel reinforced oarholders - unbreakable!
- All attachments and seams double glued!
- Extensive XXL accessory package!

iBoat = Angling Boat!  
No unnecessary line-traps

Robust lead- and carry-rope

Thick scuff rails

Indestructible metal oarlock tubes  
(Still not copied, as of 12/2016)

All attachments double taped, with additional flaps for a long iBoat life, even in extreme conditions.

# Large accessory package with all iBoats

iBoat 160, 210, 260, 320, 400, 500 / accessories also available individually!

## XXL

Accessory package with every iBoat!

- 1.) Black aluminum seat benches with multi position sliding system: 1 x iBoat 160 / 2 x iBoat 210, 260, 320 / 3 x iBoat 400
- 2.) Removable bench padding
- 3.) High pressure air pump with extra power and manometer
- 4.) Fender-Expander kit including 3 stainless karabiners and 1 quick release hook: 1 x iBoat 160, 210, 260, 320 / 2 x iBoat 400, 500

- 5.) Rip proof transport bag with folding system (no zippers) and extra strong carrying handles 1 x iBoat 160, 210, 260, 320 / 2 x iBoat 400, 500
- 6.) Robust iBoat cover with rope tightening system
- 7.) Black paddles 2 x iBoat 160, 210, 260, 320 / 4 x iBoat 400 / 2 x stinging paddle iBoat 500
- 8.) Repair kit with glue, patch material, valve key, manometer, and an extra valve

Kay Synwoldt / Carp in Focus

iBoat 260

The iBoat 160 is made of the same strong material as its big brothers. With a rock-solid high-pressure floor and a seamless taped keel you'll steer your boat with the utmost stability and on target. A small rear engine (ideally: Rhino Cobold) and an echo sounder-pole can be mounted to the transom. It fits set-up into most car trunks and is therefore immediately operational. **Your ideal partner for short sessions.**

Also in the 160 it is comfortable during the fight

**Large standard equipment:**

Dark green high pressure floor, high pressure air pump with pressure gauge and carrier bag, Fender-Expander Kit (see page 39), iBoat transport bag, detachable transom, Inox D-Ring at the bow, 3 black paddles, 2 x 132cm for regular forward rowing and 1 x 230cm for canoe-style paddling, with forward view, paddle holder on the side (also to be used to carry the boat), black aluminium seat with continuous sliding system and detachable seat cushion, user manual, quick start guide, repair kit: glue, mending kit, valve key, pressure gauge and spare valve

iBoat 160 green (material strength 0.9 mm)	449 €
iBoat 160 realtree (material strength 0.9 mm)	499 €

Searching spots with the iBoat 160

The iBoat 210, quickly operational and also as dinghy. Enough space for echo sounder, bait bucket and unhooking mat.

Christopher Paschmanns is a convinced iBoat driver and has several models in action!

iBoat 210 green (material strength 0.9 mm)	750 €
iBoat 210 realtree (material strength 0.9 mm)	799 €

The iBoat 260, when you are going on bigger trip by yourself. Enough space to also operate comfortably with two people.

Matteo Painsi at hot spot search!

iBoat 260 green (material strength 0.9 mm)	999 €
iBoat 260 realtree (material strength 0.9 mm)	1099 €

Zsolt Bundik on the Lac de Montbel in southern France

The iBoat 320 for bigger trips. Enough space to carry your entire tackle for over a week, whilst still being able to comfortably row.

René Rex, on the „Way back home“

iBoat 320 green (material strength 0.9 mm)	1099 €
iBoat 320 realtree (material strength 0.9 mm)	1249 €

The iBoats 210, 260, 320 offer significantly more space than your average rubber boat. They are the perfect companion for the ambitious carp angler. These sizes are perfect for trips with the echo sounder, put down your rigs, feeding campaigns, and drills. Due to the generous space also great to transport tackle. Many, over years with the Imperial Baits Team developed and improved features. Definitely the most sophisticated rubber boat currently available.

Always a boat length ahead, since 2009!

The boys from „Suck my Balls“ on the big move

iBoat 160

iBoat 400

iBoat 400 green (material strength 0.9 mm)	1499 €
iBoat 400 realtree (material strength 0.9 mm)	1650 €

Boat fishing – pure adventure and a sense of freedom!  
Perfect introduction with the iBoat 400!

Of course, handmade!

320 with power keel!

With love for details!

Video iBoat production on Youtube

**Generous standard features:**

Dark green high pressure floor with 2 supporting floorboards for even more stability (1 floorboard in the iBoat 210), large strategically placed scuff rails, high pressure air pump with pressure gauge and transport bag, Fender-Expander Kit (see page 39), iBoat transport bag, iBoat boat cover, Inox D-Ring with handle at bow, 2 black paddles, indestructible oarlocks with metal tubes, handles on both sides and bow, 2 black aluminium seats (210 one seat) with continuous sliding system and detachable seat cushions, user manual, quick starter guide, EG certificate, repair kit: glue, mending kit, valve key, pressure gauge and spare valve.

Carpspot Chef Sebastian Heinz at work on the Lago di Bolsena

The iBoat 400 offers a straight forward, no fuss introduction into the world of stationary boat fishing. An amazing 3sqm inner floor space is not only great for carp angling, but also to go after predators, catfish with a few people, or just for a family trip. This model has an aluminium flooring system.

Super-Turbo blower up to 0,8 bar 129,90 €

The easy way of life!

You won't need a trailer or a large storage facility, as it fits, when folded, into every estate car. You can even row it with two people, as we mounted two paddle pairs, just like in a traditional rowing boat.

1.) Fender-Expander Kit - „quick release“	29,90 €
2.) PVC coated mushroom anchor 7,5 kg	59,90 €
Set contains 1) + 2) + 2kg Carptrack boilies	89,90 €

Mushroom anchor with Fender-Expander Kit, whether in the water or on the shore - it always works great!

iBoat 400 - the next day!

...when strong batteries are more light than the electric motors!  
 Rebecell – the ultimate Li-Ion batteries for fishing!

More accessories online

**Advantages 50AH Li-Ion Battery compared to 105AH lead-acid battery**

- 4,9Kilo instead of 35Kilo and stronger , as the engine runs significantly quicker on a higher tension
- 5 x higher life expectancy (up to 5 x rechargeable!)
- No self-discharge when not in use for a while
- Better performance! Full power till the end, , shut down under 12V
- Integrated frost and heat protection

**Be gentle on your back and your wallet!**

**Example 50AH Li-Ion:** 50AH Li-Ion, including charger = 619 €  
 A good lead-acid, including charger will cost you 300 € and only offers 500 charging cycles, with a constantly decreasing performance. The life expectancy of the Li-Ion battery, for an extreme angler is about 10 years (ca. 2000 charging cycles)! Hands up, who has bought a lead-acid battery in the past, used it for more than 3, 4 years and is still perfectly satisfied?  
 So, a new one is bought. With the money spent so far, you could have bought a RebelCell 12V 50AH, which weighs 30kg less and combines many more advantages.

**Imperial Fishing - POWER FOR YOU!**

- Dimensions:**
- 12V / 11AH & 18AH = 16 x 6,5 x 9,5cm, 1 kg
  - 12V / 50AH = 19 x 13 x 15cm, 4,9 kg
  - 24V / 50AH = 26 x 17 x 21cm, 9,5 kg
  - 12V / 100AH = 26 x 17 x 21cm, 10 kg
  - 24V / 100AH = 41x 17 x 23cm, 16 kg

Rebelcell 12V 11AH	149 €
Rebelcell 12V 11AH + Charger	169 €
Rebelcell 12V 18AH	209 €
Rebelcell 12V 18AH + Charger	229 €
Rebelcell 12V 50AH	559 €
Rebelcell 12V 50AH + Charger	639 €
Rebelcell 12V 100AH	1079 €
Rebelcell 12V 100AH + Charger	1249 €
Rebelcell 24V 50AH	1039 €
Rebelcell 24V 50AH + Charger	1149 €
Rebelcell 24V 100AH	2079 €
Rebelcell 24V 100AH + Charger	2199 €

**STORMSURE GLUES ALMOST EVERYTHING!**

For Repairs, Joining, Sealing and Technical Applications!  
 The glue cures on contact with water/vapour - the best glue for fishermen!

**Examples for fishermen**

- Waders / Wellies
- Waterproof Clothing
- Inflatable Boats
- Tents, Unhooking Mats, Holdalls
- Rod Pod, Landing Net, Rigs ...

**Materials to glue:**

pvc, metals, glass, plastic, pu, composites, nylon, rubber, leather, wood, most fabrics, man-made materials and many more ...  
**- all combine underneath each other!**

**Properties:**

- Abrasion resistance ñ Great for bonding or coating objects
- Mix thoroughly with 1% clean water or special thinner for a faster cure time
- Exceptional flexibility even in cold conditions
- Can be painted on when used with a special thinner 60/40, for sealing and porous items
- Resistance to many chemicals

IMAG USED AS A BREAK AWAY LINE  
- AN IDEA FROM MAX NOLLERT 09 / 2015

3,5KG  
POWER!

SIMPLY PRACTICAL!  
THE TOOLS YOU USE MOST ARE  
ALWAYS WITHIN YOUR REACH

### IMAG - 'HANG ON!'

The iMag - 'HANG ON' is a perfect solution to hang all sorts of stuff on your bivvy walls. The little magnet can hold up to 3,5kg. It comes with a snap-hook, which is very handy to attach various smaller items.

The IB fish logo is subtly embossed on the rust-resistant iMag.

**TIP:** On thinner bivvies we recommend to use a piece of cloth or neoprene (for example an IF Rod Band) in between to protect the material.

### HANG ON:

- Head lamp
- Tent lightning
- Bite alarm receiver
- Clothing
- Scissors, pliers, cooker
- ...And much more!

### Contents:

- 1 x iMag (Magnet)
- 2 x Metal Rings
- 1 x Snap-Hook

HOLDS UP TO  
3,5KG  
WEIGHT!

iMag - HANG ON! 9,90 €

WITH THE IMAG:  
SAFE WHILE STORMS  
& QUICK NETTING!

Lanyard - big one 4,50 €  
Lanyard - small one 3,50 €

### Lanyards - robust and flexible

- Tear-resistant 'telephone cable' in black glossy design
- The snap-hook can be attached almost everywhere
- High flexibility, that doesn't wear out and allows us, for example, to have the boilie needle always handy. It can obviously be used for all kinds of necessities that you would like to keep handy.

### Length:

Small One - 12cm, extends to 90cm  
Big One - 12,5cm, extends to 120cm

... ever wondered, why boilie needles always have this hole in the grip?

Marco Bertaglia - way of life!  
He loves the adventure on big waters!

Imperial Fishing

# IF carp Entertainment is available online!

DVDs, books, stories, catch reports, tips & tricks, as well as tackle- and bait news

One of the most important components in the production of Carptrack boilies are attractive, fresh ingredients and the production, based on their individual special recipes. These are down to the collective knowledge of very successful carp anglers. Max and his creative team consistently test new products and ideas and have been doing so since the very beginning (2003). Due to the great catch successes and the following demand, the warehouse has been consistently growing. Currently we have over 250 palette spaces ready for fresh ingredients, boilies and tackle. Also the iBoats, Lines, Rod Pods and accessories have been developed by Max Nollert and his team.

By now Imperial Fishing products are available in over 20 European countries!

David Fort (IB CZ Republic)  
visiting the headquarter

Maïke Prinz - on the way with IB!

Merchandise items, such as XXL car stickers, outdoor stickers, IB door mats, titanium jewellery, wine, IB glasses, sculptures, gift certificates, posters, IB team watch and much more is available in our online shop.

Steven Kuznia

Otto Staab a german carp angler of the first hours

Our always well motivated team members and employees from the warehouse and office.

Much energy is also invested in trade and consumer shows and marketing. The customer is updated pretty much daily on the iBlog and Social Media. Imperial Baits also works closely with the most important trade magazines in Europe. But all this work won't make us forget about product development and improvement. We work very closely with our team of anglers, who constantly give us feedback and input. Our fantastic warehouse- and production team provides our renowned good and fast service and shipping to anglers, dealers and distributors.

Attention: Flavour Extra Strong!

iBoat Check!

### Success through perseverance!

Our past and present activities have been tremendously successful and we are proud to have been named and won the price for 'Best Boilie Manufacturer' and 'Best Online Shop' by one of the biggest carp magazine several times.

IB Carptrack Boilies are loved and fished by thousands of anglers across Europe. We like to look back and are excited about what lays ahead of us. Our biggest motivation is feedback and what we hear is that people like what we do and how we do it.

Do you have feedback? We'd love to hear from you!

Max Nollert & Team
