## Imperial Fishing

Thank you for your interest in our Carp-track Boilie Range! Maybe you heard of us through the great success of some of the best carp anglers from European countries! You bring the main component which is the 'feel good factor', we provide the rest and we won't disappoint you!

A huge 'Thank You' to all the fans of Imperial Fishing. They contributed to Imperial Baits being voted by Carp Mirror magazine the best bait brand in 2007/2008 and 2011/2012, in 2009/2010 the brand with the best online presence and 2011/2012 the best german carpfisher Max Nollert. We strive to make sure that you can continue to count on us!

## Philosophy

Carp will eat almost everything, however there are certain substances that they definitely prefer. To figure out which they prefer is not done in a few hours, days or weeks. Even long-term trials over several months will initially only give an indication of tendencies. Our development and production is based on years of experience at the water. We work in cooperation with a selection of highly successful anglers and together we have developed the Carptrack range. Carptrack is a range of products that manages to attract the carp like no other product whilst also offering the perfect diet for carp.

No matter if you fish short sessions without pre-baiting or longer sessions, Imperial Baits Carptrack products are taken quickly and the carp will continue to feed on it in the longer term as well.

## Imperial Baits - Carptrack Boilies

ready **2** catch

Launched 9 years ago, and a success story ever since, the unique Imperial Baits Carptrack boilies are rolled from the exclusive Carptrack Mixes. In addition we use our highly effective flavours, Carptrack liquid, Carptrack inL, Carptrack liquid AMINO, Essential Oils as well as NHDC Liquid. *All for your success when doing the most you love to - fishing for carp!*

### The special about the Carptrack Range

These boilies are attractors, an instant and long-term bait in one. That means for us nutritious boilies, produced from different natural and highly attractive ingredients. Our focus is that these ingredients partially dissolve and as palatants stimulate the carps taste buds from afar. Non taste- or remarkable extensive stabilisation against mould is a given!

### Carptrack stay fresh for longer than other boilies

One characteristic of our boilies that is appreciated by many of our customers is to critically control the moisture content. Stabilising our boilies is time consuming and expensive. But the taste it's hardly noticeable and it prevents the premium mix from mould for at least 1 year. A useful side-effect is that the boilies won't dry out quickly, even if the bag has been opened. This keeps the boilies moist and tasty for a long time. It is a great feature, meaning that your bait is always fresh!

### Proteins and other attractors

Carptrack Elite and Monster-Liver are top of the list, due to their high protein content. Followed by Carptrack Fish Boilies, Monster's Paradise, Elite Strawberry and Worm Up. To balance the lower Amino Acid profile of Osmotic Spice, Explosive Stickmix and Birdfood Banana Boilie, besides using a highly attractive mix, we have also added Liquid Amino and the fantastic sweet Carptrack NHDC. Uncle Bait 'The Boilie' also lead with the stockings in this league.

### Loaded power

Attractive, water-soluble taste, a multi-layered taste and a complete amino acid profile, generated through the protein rich base mixes make the Carptrack Range, which consists of Additives, Mixes, and Boilies, one of the most extraordinary bait products in the carp scene. We have been proudly producing these baits for over 9 years now and are looking forward to many more!

### One-Of-A-Kind Catches

From the beginning it was extraordinary what has been caught on this bait. The fantastic feedback is our motivation to continue doing what we do and how we do it!

## MONSTER'S PARADISE

Ø 16mm, 20mm, 24mm

A soft and gentle bomb, as long as it doesn't hit the water! **Then it's a firework of the senses!**

There is a reason that this boilie is the base to our fantastic Carptrack Monster Boilie, but contains only half of the Carptrack Powder content, making it less filling and therefore more versatile and easier to handle.

It contains 5% Hungarian Paprika, 5% Spanish Pepper for sure from Haith's and hotter than Robin Red, 2% Asian Garlic Powder and NHDC – The Original. It is rolled with 7ml/kg Carptrack Bloodworm Flavour and 1ml/kg Garlic Essential Oil. Together this creates a bombastic effect regarding immediate and long lasting attraction and elution.

- 2kg = €27.90
- 5kg = €67.50
- 8kg in iBox = €109.90

**The strongest Boilie in the world! Without prescription!**

### Carptrack Monster's Paradise Boilies and Carptrack Explosiv Stickmix Boilies are also available in a Cold Water Version!

With our Cold Water products we guarantee maximum water solubility, especially in cold water conditions from November until April. **More about that on page 11.**

Ø 16mm, 20mm, 24mm

## Explosiv Stickmix

Extra special carp magnets like Carptrack Protein concentrate, Fishmeal, Vitamealo, inP, GLM full fat blend, Betain, NHDC and Hemp are part of this exclusive mix. Spring, summer, autumn or winter, the Carptrack Explosiv Stickmix Boilie works all year around as soon as falling into the water.

Made with the popular Carptrack Liquid Amino, Carptrack NHDC and Carptrack Honey Flavour – it's truly sensational!

**Let it explode in combination with the Explosiv Stickmix & Ground Bait!**

- 2kg = €24.90
- 5kg = €59.90
- 8kg in iBox = €94.90

### BIG ONES love it sharp!

- Special Ingredients** • Carptrack inP • Liquid Amino  
 • Worm Up Flavour • Oriental Spice E. Oil • Shrimps  
 • Egg- & Lactalbumin • Linseed Crush • Fly Larvae  
 • Protein- & Squid-Liver Concentrate  
 • Cayenne Pepper • Roasted Hemp

## Carptrack Worm Up Range

We used the 'Crowdsourcing Method' in the development of the Worm Up Boilies, which was an interactive process, where the community could take part and took over 11 months!

See all details at: [www.my-boilie.com](http://www.my-boilie.com)

**The mix is exceptional:** Imperial Baits is the first bait manufacturer to use highly attractive fly nymphs (Hermetia)! Linseed delivers one of the highest concentrations of Omega 3 fatty acids. Fresh shrimp add a slightly salty note and a healthy portion of Cayenne Pepper spices things up a little! As a source for Fat/Protein we included roasted crushed hemp and combined all that with Lac- & Egg albumin for a solid foundation.

Only short boiling times create a hard Boilie and go easy on the ingredients.

We enrich the Boilie with 15ml/kg Carptrack Liquid Amino, 8ml/kg Worm Up Flavour and 6ml/kg Essential Oil Oriental Spice.

## Carptrack Birdfood Banana Boilies

Nearly 100% water soluble Lamb's Milk, Carptrack NHDC (6ml/kg), Liquid Amino (12ml/kg) and probably the best Banana Aroma (8ml/kg) on the market give this Boilie a very distinctive and intensive scent and taste. No matter if you are fishing short or long sessions, these boilies are always a source of important energy for carp.

They are very effective with experienced carp and are also successfully used on rivers.

## Carptrack Cold Water Boilies

**Cold water and still landing the big ones!**

**The 5 most important rules to guarantee success:**

1. Don't overfeed! Fish digest food in cold environments very slowly (poikilothermic coldblooded animals). Feed little and often small portions!
2. From October onwards take note of where the carp are hold-up as this is likely to be close to their winter quarters.
3. Look for deep water or holes in which the water-flow is reduced and where the watertemperature is 4 centigrade in the dead of winter! A water always freezes from the surface down to the bottom where you find the warmest temperature than.
4. Carp tend not to move far in the winter time. If your swim isn't productive, find another one and keep changing till you have the first fish contact.
5. Feeding periods of a carp in winter are often short. Low pressure conditions are often the most successful.

**Carptrack Cold Water Boilies have been specifically developed for fishing between the months from November until April, with colder water temperatures below 12°C.**

The ingredients in the Boilie Mix are the same, but we have increased the amount of water soluble components. This makes the Boilie easier to break down and the exchange of attractors is instant. Our team anglers and customers place great trust in our Cold Water Boilies and they have proven successful in the most extreme conditions even in frozen lakes.

# Recipes

The original Cartrack recipes can be found each of the Boilie- and Mix Descriptions!

## Carptrack Squid and Squid/Liver flour

The Carptrack Squid and Squid/Liver flour contains a high concentration of Free Amino Acids. This Boilie ingredient is very attractive and water soluble (Palatant) and is normally used as 10% - 25% of a Boilie Mix.

**They improve even the most basic home-grown mix massively.**

The concentrate is very intense in taste and gives your recipe huge pulling-power in all conditions. Up to 50% in a mix has been successfully tested.

**Also very effective as an after Bait-Pimp!**

1kg = €12.50 • 3kg = €34.90 • 10kg\* = €119.90

**\* delivered in iBox the Big One!**

## Carptrack Protein Concentrate

High protein concentrate whilst being perfectly digestible, low ash content, high in water soluble proteins, excellent binding properties make it perfect for Boilie production.

**Highly stimulating for carp and also other species.** Use 5% - 10% Carptrack Protein Concentrate in your Boilie Mix.

Carptrack Protein Concentrate is an important ingredient in all Carptrack Mixes. The results are truly remarkable.

**Also very effective as an after Bait-Pimp!**

1kg = €6.90 • 3kg = €16.90 • 10kg\* = €59.90

**\* delivered in iBox the Big One!**

### Additional tip

Mix Carptrack Squid / Squid Liver and Protein Concentrate with soil and sand. This creates a highly attractive cloud underwater. You can add further additives like inL/inP or GLM Full-Fat Blend for even more attraction.

### Trouble choosing?

The previous record Common Carp (86.31lbs) has been caught by Dieter-Markus Stein on 17.12.2006 on V-Pop white, pimped with Carptrack Amino Dip.

### Characteristics of this hook bait:

- Hard and solid
- Long buoyancy, even at great depths
- Highly visible due to special luminous colours

### How to use:

- Use the natural curiosity of the carp. Fish V-Pops over the feeding area or as a Single Hook Bait.
- Enormous number of catches from clear and semi murky waters speak for themselves...
- Pimp neutral V-Pops as you wish. The Carptrack Amino Dips with its adhesive strength, Amino Gels and Flavours works very well for this.
- Try pressured venues even with baits without added flavours!

## Carptrack Half'n Halfs

ready <sup>2</sup> fly

Carptrack Half'n Halfs combine the visual and flavourful appeal in a very special way. Being produced half from V-Pop white and half from an original Cartrack Sinker Mix keeps them powerful tasty and attractive! They last as hookbaits much longer than two cut halves. Another great advantage is the perfect balance of the bait by putting small lead to the hookbait. The carp hardly notices it by its weight which makes it easier to be sucked in. Success all across Europe prove this great quality bait.

## Imperial Baits - Carptrack Additives

ready **2** catch

Carptrack Additives are incredibly easy to use for the production of boilies as well as with readymade boilies or other Carpfod.

One or alternatively several Carptrack powder Additives will be „fixed“ at the application from the outside of Baits with Carptrack Liquid, Carptrack inL or Liquid AMINO.

Because they are concentrated, we advise not to use more than the recommended dose. The products are very efficient and increases your chances of catching tremendously, as thousands of success stories around Europe prove. We have a 12 page leaflet 'Pimp my Bait' info for you that explains the great enhancement of bait in detail and with pictures.

Bless your baits and outsmart the carp!

# Imperial Baits - Pimp my Baits!

Dear carp angler,

with the wide range of Carptrack Additives and Ingredients we offer you a comprehensive repertoire to get maximum success in every situation on your hunt for big Carp.

This brochure introduces our products, how to use them and the possibilities they offer with maximum attraction from day one, even without pre-baiting.

We get feedback from our team anglers around Europe and pass it on to you.

Imperial Baits wishes you great success at the water and is happy to share decades of knowledge and experience with you!

## Where to use it:

The Carptrack Additives can either be used to enhance the Boilie Mixes or sprinkled on boilies afterwards, which we would like to focus on in this brochure.

Refining your carp bait, no matter if Pellets, Particles, Boilies, Ground Bait or Stickmix, is of great advantage in every situation and condition while carp fishing.

Especially when the fishing pressure is high or during very quiet times when nothing is happening it's even more important to introduce an attractive bait to present the carp with a feeding trail that he won't be able to resist and which will trigger his appetite.

## The Soil/Sand Tip

Mix Carptrack Squid / Squid Liver and Protein Concentrate with soil or sand. This creates a highly attractive cloud underwater.

You can add further additives like inL / inP or GLM Full-Fat blend for an even higher attraction of the combination.

# Tip for dough or taste for paste?

Mix 1 part Carptrack Liquid and 7-10 parts Carptrack Powder and you will get an irresistibly paste which is similar to a chewing gum. **Use it to coat your Hookbaits or Boilies!**

Prepare the bait before you go fishing and keep the ready coated hookbaits in a bag or tub, then they stay fresh for weeks! Or mix it on the bank when you are fishing...

The paste has a very intense smell and keeps emitting attraction for 10 to 50 hours (depending on the water conditions). This special attraction can't be achieved by any boilie of the world!

If you are looking after the ultimate attraction then you should give Carptrack Liquid and Powder Paste a try! We are sure it will delight you!

**Every Imperial Fishing Team-member, as well as many professional carp anglers over Europe, swear by that Carptrack Wonderpaste!**

## Additional Tip:

Prepare the paste in a small plastic bag containing 50g-100g. Knead the paste from the outside of the bag to keep your fingers clean.

# Carp are gourmets!

## Carptrack GLM full-fat blend

A thousand words can't describe the difference in taste to the poor fat free version of GLM. Oils and fats give the taste to this popular product from New Zealand. These products are generated through the defatting process and are mainly used in the pharmaceutical and cosmetics industry.

GLM Full-Fat is much more expensive and much more powerful in taste and attraction! **It is less soluble in water!** We produce a 50/50 blend, which perfectly combines the advantages of water solubility and great taste.

Carptrack Full Fat Blend is a standard ingredient in a lot of our products but we also still like to use it as a powder-dip to further enhance our baits.

The effect it has on carp is phenomenal, even in low dosages. Together with other Carptrack Additives the already impressive allure can still be improved.

# Don't spend more, catch more!

Reduce the amount you feed but sprinkle your feed with Carptrack additives to increase its pulling power!

## Carptrack NHDC and Carptrack Power Powders

When it comes to fine tuning then Carptrack Power Powders deliver the taste and aroma, as well as NHDC the original for the very special sweetness.

Carp like it sweet. NHDC is 1800 times sweeter than sugar, without being bitter at all! Therefore 3-7ml/kg bait is large enough.

Use it for example to enrich Liquid Amino or Carptrack Liquid and add it to your bait to achieve a more 'rounded' and tasteful flavour. We guarantee an amazing and very unique taste!

Carptrack Power Powders in the mixes of Elite Strawberry, Osmotic Spice, Tutti Frutti, Banana and Cream/Scopex are highly concentrated. Only 1g/kg bait are enough to change the taste and smell significantly. Use it to improve your own Boilie mixes, Stickmix, Ground Bait or sprinkle it onto Boilies or Particles. **Try it for yourself and be curious for the surprise!**

NHDC also works great in Morocco at Bin El Quidane lake where carp are not regularly caught on boilies!

Success recipe per kg bait:

## Which Cartrack Additives are most suitable for which Boilietype?

We distinguish our boilies between Stinkers and Yummies:

Worm Up • Monster's Paradise  
Elite • Monster/Liver • Fish

Uncle Bait • Explosiv Stickmix • Elite Strawberry  
Osmotic Spice • Birdfood Banana

Their strong taste and smell make Cartrack Liquid and Cartrack Powder the perfect additions to stinky boilies. Both components stick very well to the Boilie and work for a long time under the water. Remember when you are sprinkling your Boilie to use the powder first and after shaking well to add the liquid. This guarantees the perfect distribution.

The intense aroma of Cartrack inL and inP doesn't remind you of tasty strawberries or bananas, but together these additives create an attractive combination with our Yummies. These highly water soluble components work even in waters that normally don't respond to stinkers at all. Especially in winter time you should be working with inL and inP, obviously also on the Stinkers.

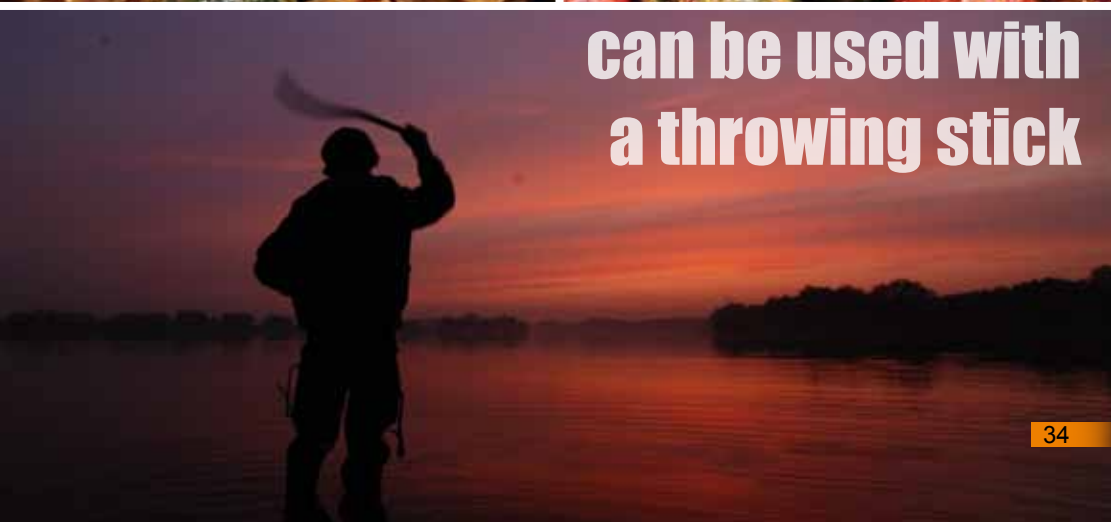

Freshly sprinkled boilies

dry them for 2-3 hours

can be used with  
a throwing stick

## Liquid Amino

A very special  
taste!

Cartrack Liquid Amino has a rather explosive taste, but with a soft aroma. A lot of carp anglers like using it in combination with Cartrack inP or Cartrack Powder to sprinkle their boilies afterwards. It creates for Stinkers and Yummies a perfect additional note and is exceptionally stimulating for the carp.

Also in combination with our Power Powders or in connection with the different Amino Gels a blast! **Feel free to experiment! With our Additives you can not go wrong!**

**Dry and perfect for the throwing stick**  
All Cartrack Additive sprinkled boilies can be used with a throwing stick. Just make sure the Additives have been soaked in long enough and slightly dried. Depending on the dosage that only takes a few hours.

### Carptrack Liquid and CT Powder

Those special Liquid & Powder have an enormous attraction to carp. They are natural based products. The systematic addition of L-Amino Acids, as well as the following Mail-lard Reaction make this product one of the best attractors for carp. Use Liquid and Powder together to combine their individual great effects in combination. Make the irresistible Cartrack Paste with Cartrack Liquid and Powder. Enhance the taste even more individual with one of the different, efficient Cartrack Power Powders. You can find more tips and tricks on how to pimp your bait in our leaflet 'Pimp My Bait', pages 27-38.

### Carptrack Powder

Dosage Powder: up to 25g/kg

300ml = €9.90 • The Big One 1000ml = €24.90

Powder 50g +  
Liquid 12,5ml

# Carptrack Paste

**Cartrack inP and inL** are water soluble enhancers in powder and liquid form, which signal food to the carp in a natural way through Lecithin, Yeast and Liver. Recommended to be used in your boiliemix and / or sprinkled onto the outside of Boilies, Pellets, Particles and Stickmix. **A true carp magnet!** Max Nollert and René Rex have already been fishing these great products from 2000 and 2003 with well known great success.

**Cartrack inP**

Dosage: In the mix or to sprinkle onto the outside 30-60g/kg  
150g = €10.90 • The Big One 500g = €24.90 • Mega One 1kg = €45.00

**Cartrack inL**

Dosage: In the mix or sprinkled onto the outside 20-40ml/kg  
Tub 300ml = €8.90 • The Big One 1000ml = €22.90

**Cartrack Liquid Amino** triggers a strong feeding impulse in carp. Ingredients: Dissolved Betaine (N-Trimethylglycine), L-Methionine, L-Cysteine, L-Alanine, L-Arginine, L-Proline, L-Tryptophan, Vitamin B6, Protein, Carbohydrates. Especially Bernard Hesse contributed to the development. He has been using these ingredients for over 18 years. Also in some of the most recent catches the addition of Liquid Amino also played a big part.

Dosage: In the mix or sprinkled onto the outside up to 20ml/kg  
Tub 300ml = €11.90 • The Big One 1000ml = €24.90

**Cartrack NHDC the original** (Neo Hesperidin Dihydric Chalcone) is 1800 times sweeter than sugar. The taste is so unique, making it instantly recognisable for you and the carp. One of the best carp-magnets around. Use it for your own Boilie production and/or externally for example with Cartrack Liquid Amino to pimp your baits. Our original NHDC has been often copied but has never been beaten! Please compare.

Dosage: In the mix or to be sprinkled onto the outside 3-7ml/kg  
Alu Flacon 65ml = €14.90 • The Big One Alu 300ml = €44.90

**Cartrack GLM full-fat blend** can be used in the mix or to be sprinkled later onto Boilies and Particles. A thousand words couldn't describe the difference in taste of this energy packed GLM compared to the fat-free version. Oils and fats are the main taste carrier which are still in this product. They are normally used in the pharmaceutical and cosmetic industry and normally exported at a much higher price for sure.

Dosage: In the mix or to be sprinkled onto the outside 5-30ml/kg  
Tub 100g = €17.90 • The Big One 500g = €79.90

**Cartrack Intense Fish Oil** gives a pure and therefore very intense fishy taste, which is known as an instant attractor (it is the main attractor in most pellets) and contains vitally important fatty acids. It's a remarkable ingredient for every Boilie Mix. Summer and Autumn are the best seasons for a successful session, even in intensely fished waters. Highly attractive and creates a cloud of attraction that rises through the water.

Dosage: In the mix or to be sprinkled onto the outside 20-40ml/kg  
Dose 300ml = €7.90 • The Big One 1000ml = €14.90

**Cartrack Aminoacidkomplex, Cartrack Betain and Cartrack Liver Powder** have the advantage of containing a lot of different Amino Acids. Their attraction to carp has been documented and proved while fishing many times. These are very popular additional ingredient for the Boilie production at home. They are also very effective when sprinkled onto the outside with Cartrack Liquid, inL or Liquid Amino.

Each of these three Cartrack Additives has a very distinct taste and smell. Add this intense note to your bait, which will make it much more attractive and more powerful to catch carp!

Dosage: Use 5-10g/kg Boilie Mix for Cartrack Aminoacidkomplex and Betain and up to 50g/kg Boilie Mix for Cartrack Liver Powder.

**Liver Powder** 150g = €10.90 • The Big One 500g = €24.90  
**Aminoacidkomplex** 100g = €14.90 • The Big One 750g = €79.90  
**Betain** 150g = €13.90 • The Big One 600g = €39.90

**Cartrack Stabil'it** – effectively inhibits the growth of mould, for weeks! Add to your eggs. Stabil'it gently stabilises without the burning side-effects found with some preservatives and your mix become even easier to roll. Use BPS for your production. Dry your boilies for at least one day, store them dry and cool and never expose them to direct sunlight. That guarantees a long Boilie stability and freshness.

Dosage: 50-80 ml/kg  
Tub 300ml = €6.90 • The Big One 1000ml = €14.90 • 5 Litre = €49.90

**What are Cartrack Power Powders?**

From the start we used the Osmotic Spice Power Powder for the Osmotic Spice Mix with a dosage of just 0,075% in the Boilie Mix. Same with the Strawberry Power Powder in Elite Strawberry Mix etc. Only up to maximum 1g/kg of the Power Powders are being used for Boilie Mix, Stickmix or to be sprinkled onto the outside. They are highly efficient and a 100g tub is enough for 100kg of Boilie Mix.

**Power Powder Elite Strawberry** 100g = €14.90  
**Power Powder Osmotic Spice** 100g = €14.90  
**Power Powder Banana** 100g = €14.90  
**Power Powder Cream/Scopex** 100g = €14.90  
**Power Powder Tutti Frutti** 100g = €14.90

**Only 1g per Kg makes the Job!**

**What Max Nollert has to say about this:** *'After all these years as a carp angler and bait manufacturer, I'm still amazed how much impact Flavours and Essential Oils have on the feeding habits of carp.'*

Carptrack Pellets dissolve very slowly and have been produced to meet the needs of coarse fish. They catch EVERYWHERE immediately and can also be used as excellent additional food for fishing with Carptrack Boilies or in combination with the Carptrack Stickmix.

### The special effects:

Use Carptrack Liquid (Amino), Fish Oil and Powder on these pellets a few hours before feeding. Same as with the Boilies. **Good luck and enjoy taking great pictures of your catches!**

## Imperial Fishing Boilie Protector Spray – BPS

That's what a Carptrack Boilie should look like! Thanks to BPS!

- Full taste and aroma
- Dry, hard and solid
- Perfectly round

## Boilie Protector Spray

**Boilie Protector Spray**, or short BPS, is an absolute innovation for the home production of Boilies. Optimise your production! Rolling perfectly round boilies has never been this easy and they are ready for immediate use!

1 bottle BPS is enough for approx. 100kg dough. Spray a little bit onto your gun, the rollers or the dough sausages and take advantage of the following effects:

- Solid sausages go through the gun much easier
- Dough strands and Boilies don't stick together anymore
- You finally roll the perfectly round Boilie on your roller
- The unboiled Boilies don't deform anymore, as you can use harder dough
- The Boilies take less water in when being boiled. That results in being dry, hard and ready after only 1-2 hours!
- Much less loss of the ingredients when being boiled
- Therefore less clouding and foam
- Neutral in taste and smell
- Improves the inherent smell of boiled and dried Boilies
- Utensils are much easier to clean, no more sticky mess!

**Spray can 600ml = €9.90**

# Imperial Fishing Amiaud Combi Carpos

## Amiaud Combi Carpos

The Combi Carpos, made of stainless steel are very flexible to use and therefore at home at all water and conditions. They combine the advantages of the Mini Carpo (top section) and the Carpo (tripod). Further advantages are a small pack size, high stability and functionality. No matter if you use it with 2, 3 or even 4 rods, you'll always look good on the bank. It comes with 4 curved buzz bars. The front buzz bar is telescopic, so it can be changed quickly to a 2, 3 or 4 bite alarm set-up. In addition you can finally use 1 or 1.5m legs (extensions) for extreme conditions.

### Combi Carpos – exclusively from Imperial Fishing

- Materials: Anti rust steel or stainless steel (Inox)
- Perfect stability due to Carpo tripod
- Tripod height fully adjustable
- Easy rod alignment, due to quick fastening
- Variable length of the rod placement (max. 190cm)
- Variable Buzz Bar height
- For 2, 3 and 4 rods
- Comes with a luxury transport bag.

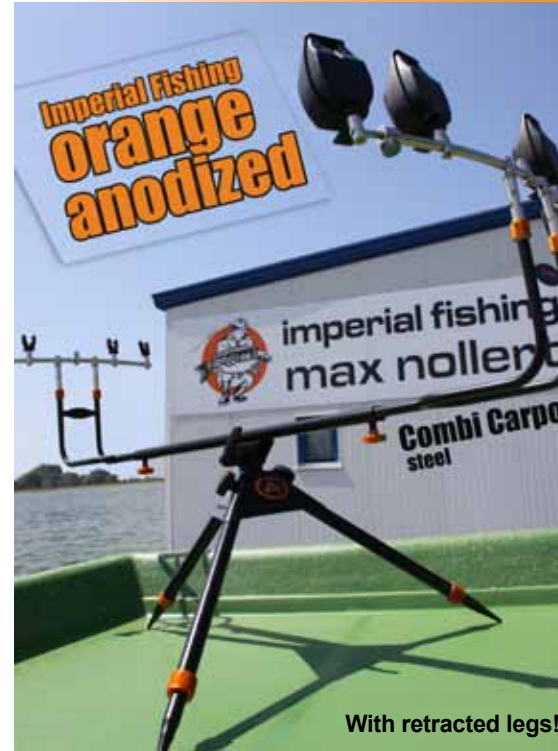

Combi Carpo Inox (Stainless Steel) = €479  
Combi Carpo Steel in black = €329

- Extension leg steel 1m: €17.50
- Extension leg steel 1.5m: €19.90

### Stability

With the 50cm extension legs, the feet are 120cm apart, which gives great stability.

**New since 2012:** An Inox bolt of 10mm diameter and a practical handle, as well as 2 holes that stop any sliding when tightening, guaranteeing a solid fixing at the desired angle.

Through Extension legs of 100 and 150cm the rods can be placed accordingly high.

### Height measurements:

- Height minimum Standard Legs: 40cm to 60cm
- Height minimum 1m Extension Legs: 70cm to 85cm

- 5% of 50-60 Shock`it Shockleader

**SNAGGY WATER**

**NEW 2013 - Invisible- & Visible Touch – Snaggy Water**

*Dyneema Made in Germany – 0.30mm diameter – 21 kg (46lb)*

Extreme conditions require extreme gear! That is why we developed the new **Snaggy Water** version of the already very popular braided 0.17mm main line with the same name.

Especially when the rig is being retrieved over several hundred meters through the water, it will pass plenty of obstacles, like weed, shells, sharp stones, etc. That is when you want a really good line to avoid breakages. The finely braided **Snaggy Water** is ideal for **hard core missions** and with a diameter of 0.30mm and breaking strain of 21kg (46lb) it is **almost indestructible**.

Available in grey and yellow!

**300m = €54.9 • 600m = €109.80 • 900m = €134.70**  
**1200m = €179.60 • 1500m = €224.50**  
**1800m = €269.40**

**SHOCK IT!**

**Shock`it - Super Shockleader**

Shockleader made in Germany.

- Extra abrasion resistant
- Very smooth
- High knot strength
- Great casting performance
- High stretch

We chose the colours brown-transparent, for it to blend in perfectly with the ground. Ideal in combination with our braided main lines • Invisible- Visible Touch and the new Snaggy Water. The Shock`it provide the necessary security and expansion during the final battle.

**Shock`it = €9.90**

**Clue:**  
There is a reason why well known anglers like **Meik Pyka** swear by our lines when facing extreme hard conditions like at Rainbow Lake!

## Imperial Fishing Tackle<sup>2</sup> catch

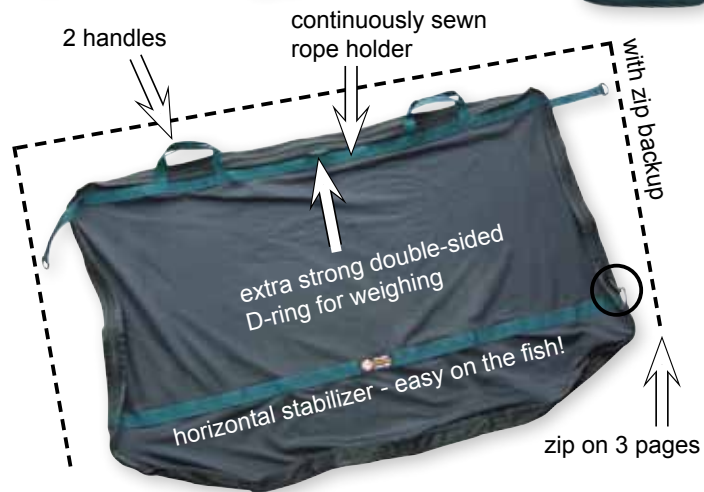

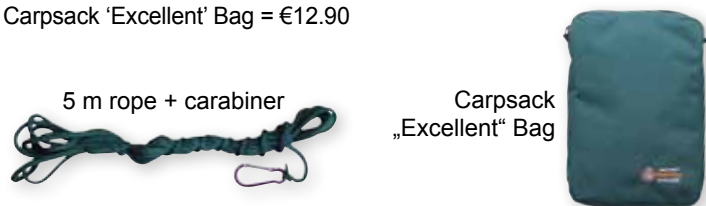

### Imperial Fishing – Carpsack ‘Excellent’

When handling the carp we must be very careful. In order to avoid injuring the Carp we thought a lot about how to develop the safest carp sack on the market:

- Size: 115cm x 80cm
- Smooth and easy running zip over three sides
- No pushing the Carp into a 'tunnel' just fold it open completely
- The horizontally re-enforced, the sack offer the Carp from the side Vertical re-enforcements have the problem that they squeeze the Carp in the chest area and the belly
- The Carpsack 'Excellent' has two handles for perfect and safe transport, if necessary by two people
- The Carpsack comes with a 5m rope, that allows the fish to move away from the bank into deeper water
- The Carpsack also comes with a carabiner
- Optional accessory: Extra Carpsack bag to avoid odours

Carpsack 'Excellent' incl. rope and carabiner = €39.90

Carpsack 'Excellent' Bag = €12.90

### Imperial Fishing - Boilie Air Dry Bag

Premium and very stable. Zips on top and bottom allow easy access, even when the bag is hanging on a tree.

Boilie Air Dry Bag 4kg = €12.90

Boilie Air Dry bag 8kg = €14.90

## Imperial Fishing Tackle<sup>2</sup> catch

### Imperial Fishing - Boomerang (Throwing Stick)

The throwing stick for accurate distance throws!

If you want to feed boilies in a large distance, you don't only need speed and endurance, but also some assistance.

Allowing to increase speed quickly and release at the right time.

The Boomerang has been cast in one piece. The big curve allows you to actually pick up the boilies out of the bucket, whilst standing. No more bending over. They just roll in and can be thrown right away.

Bumerang for Boilies, ideal 16 to 24mm diameter Ø = €24.90

### Imperial Fishing - Carp Pillow

Soft and comfy pillow, with different textures on each side

- Winter, with short soft fleece
- Summer, with soft cool fabric

Measurements: 40 x 28cm = €19.90

## Imperial Fishing iBoat 160 – car trunk boat

The iBoat 160 is made of the 3 layered Dezitez 1100 material and a rock hard high pressure floor (0.6bar). That makes it incredibly sturdy and almost unsinkable. The under keel guarantees to be perfectly on target. It has the paddle retracting system, that has never been seen in such a small boat before. The Original – developed by Max Nollert.

Space is in our hobby a luxury and normally 160cm is all that is available for the boat in a saloon or estate car.

### Everybody has use for them:

- Just going to pre-bait
- Quick echo sounder investigations
- Safety boat for a lot of carp anglers
- For long walks, clever to convert it into a trolley
- Spare boat on bigger trips
- Unhooking mat

**packed state:**  
95cm x 45cm x 25cm  
only 8.9 kg!

The great advantages of the iBoats 260/320 is that they offer a much bigger internal space than other boats in their category. They are the perfect boat for the ambitious angler. A great size for exploring tours with the echo sounder, to rest your rods, feeding activities, drilling and thanks to its large internal space also a perfect tackle boat.

### iBoats have been specifically developed for carp anglers

- More internal space than comparable models 260 or 320
- no line-catchers!
- Multiposition adjustable seat (back for the drill, forward for paddling)
- 0.6 bar high pressure floor for quick inflation and deflation
- Extra strong PVA material Dezitez 1100
- Sturdy metal oarlocks on all iBoats
- Thick and sturdy bankseats

### Generous standard quipment:

- High pressure floor • High pressure pump
- oversized transport bag • Inox D ring at bow
- Fitting for the echo sounder pole at stern
- 3 paddles (2 x 132cm to go backwards and 1 x 230, to move forward canoe style)
- paddle retraction on the side
- carp rod holder on both sides
- Seat, including bank-easy-on-off system and sliding system (multiposition)
- Repair kit • Spare valve
- Fender-Expander Kit (see page 39)

iBoat 160 = €449.00

- Manometer • Fender-Expander Kit (see page 61)

iBoat 260 = €1099.00  
iBoat 320 = €1250.00

### Space Wonder

The large interior is achieved through shorter cones behind the motor bracket, more width and as long as possible straight tubes, with the merge at the last moment to the bow!

# Imperial Fishing iBoat 400 & technical details for iBoats

The iBoat 400 is primarily made for stationary boat fishing. It has a multiplex floor, which is lighter than aluminium and even more importantly very quiet. The boat is 190cm wide and the inner floor space is an impressive 3 x 1m. The iBoat 400 gets you closer to the carp and it can be transported in any car boot! **No boat trailer needed!**

All iBoats are made of very sturdy 3layered 0.9mm hightec PVC material (Dezitex 1100, cold velded) and extra abrasion material on the right places.

### Generous standard equipment:

- 5 elements of the multiplex floor (weight 36kg) including the aluminium connecting rails
- 2 oversized transport bags
- Inox D-Ring at bow
- High pressure pump
- 4 paddles
- 3 seats including bank-easy-on-off system and sliding system (multiposition)

### Fender-Expander Kit

Inflatable, very sturdy Fender, made of Dezitex 1100 material.

#### Features:

Practical dinghy valve, 2 Inox D-Rings, 1.5m Expander, 4 aluminium carabiner

#### Where to use it:

Flexible boat fixation at bank stick or mushroom anchor, fix carp sack, diversion buoy, buoy for catfish angling – floating refuse resistant!

Fender-Expander Kit = €19.90

### Mushroom anchor 7.5kg PVC coated

The 7.5 mushroom anchor from Amiaud is perfect to use the Imperial Fishing Fender-Expander correctly.

Attached the mushroom anchor to the end of the Fender-Expander, the Fender should be floating as a buoy on the surface. In difficult situations you can attach your iBoat to the Fender, which allows the boat to float safely, away from shore rubble.

Also great to get the carp gently into the sack, re-direct lines or use as throw anchor during turbulent drills.

Mushroom anchor 7.5kg PVC coated = €44.90

### Guide Markus Paporozzi [www.guiding-tour.de](http://www.guiding-tour.de)

I wouldn't ever want to miss the Bravo 12V Super-Turboblower on my tours. It works on its own and I can meanwhile set up my tackle. There is no quicker and easier way to inflate a boat.

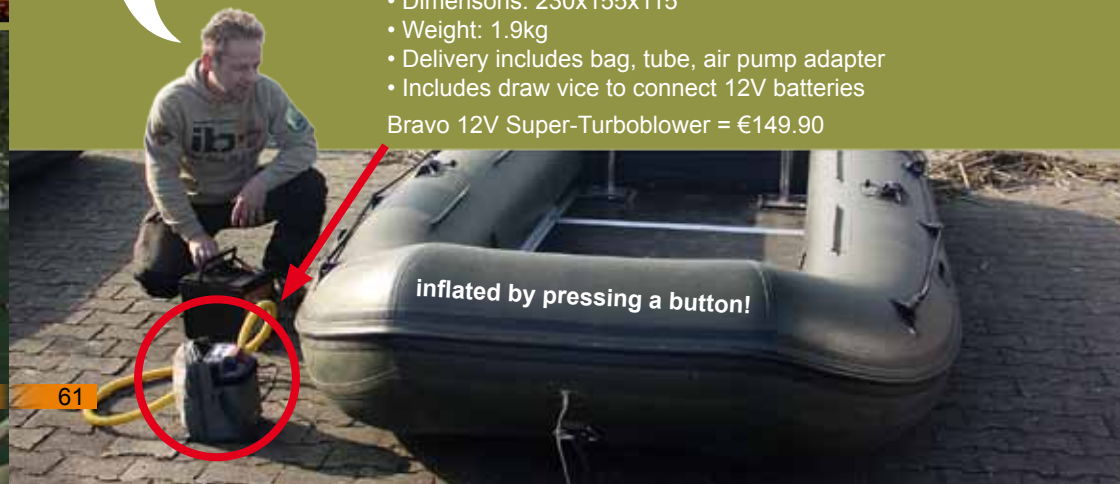

### Bravo 12V Super-Turboblower up to 800mbar

Perfect to inflate and deflate dinghies like our iBoats or Fender. It automatically stops when the set pressure has been reached. The iBoat 320 takes about 2-3 min to be completely inflated. It can also be used for high pressure floors that require 0.6-0.8bar.

#### Details

- Performance: 450litre/min, pressure can be regulated till 0.8
- Dimensions: 230x155x115
- Weight: 1.9kg
- Delivery includes bag, tube, air pump adapter
- Includes draw vice to connect 12V batteries

Bravo 12V Super-Turboblower = €149.90

## Imperial Fishing Session Packs

### Imperial Fishing Session Pack 7.0 AH

Long Life Power! Lead gel battery 12V 7.0 AH

We do love the peace and quiet at the water but let's be honest, we still wouldn't want to miss our various electronic devices! To be able to keep up with the energy requirements of them, we came up with a practical gadget:

#### The Session Pack 7.0 AH

With the help of a 12V cigarette lighter, which can be found cheaply at most hardware stores, the Session Pack 7.0 AH quickly turns into a charger for everything from mobile phone to laptop. Recharge with charger from page 63!

#### Special features:

- Sturdy and reliable
- Practical compact size (6.5cm x 9cm x 15cm)
- Weight 2.26kg

Session Pack 7.0 AH = €24.90

### Imperial Fishing Session Pack BIG ONE 80 AH & 100 AH

AGM cycle batteries – they are the ones we need.

The Session Packs BIG ONE 80/100 AH are recommended for all activities that require a lot of energy as well as reliability. For example for electric motors for boats. Lead gel batteries have a life expectancy of 10-12 years and are re-chargeable.

#### Special features:

- Impact and breakage resistant
- Maintenance free operation
- Sturdy and robust construction
- Perfect high current characteristics
- Great charging efficiency
- Excellent cycle consistency

#### Important information:

Session packs, like all batteries should be charged as soon as possible after usage, to retain their long life expectancy.

Works with all standard chargers. We recommend the Xtreme Charge on Page 63!

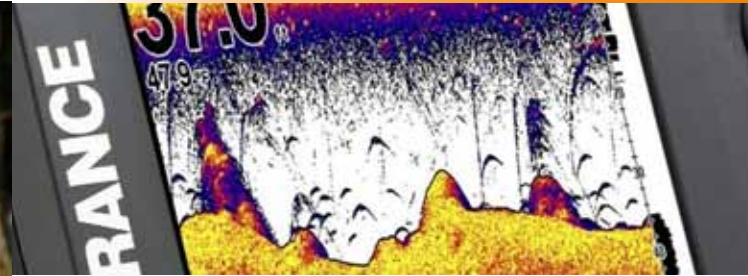

Session Pack BIG ONE 80 AH = €249.00  
Session Pack BIG ONE 100 AH = €279.00

### Unplugged Catfish I: Giants of the Ebro on the 11th Sept. 2001

Unplugged, because this is an amazing video in original quality that could only have suffered from editing or cutting.

Filmed at the breath-taking Lakes Caspe and Ebro, you will not only see catfish drills at all hours of the day and night.

Different terrain, glorious sunshine to really rough conditions with strong winds, you will be watching 11 unforgettable days at the water in which 63 catfish were caught by us two guys. 15 of those were over 1.80m long and two were absolute monsters at over 140lb and over 150lb.

It could not have been better if it had a script and a director. It is true what they say, life tells the best stories!

2 DVDs – over 4hours = €18.50

### Constantin - The path of a carp angler by Peter Schuh *German language only! – SORRY!*

Travel with Constantin Husch on 263 pages through his life – a life full of highs and lows. Growing up, not always as it was expected from a teenager. He discovered fishing for himself and with it a great passion for the hunt for big carp. He found his big love, the love of his life. Honest and full of setbacks. This is how the author Peter Schuh created a novel, as life wrote it.

Many people read a pre-release of the novel and were blown away. There were even some tears!

You don't need to be an angler to understand this book and it explains perfectly our love and passion for our hobby.

You probably will see yourself between these lines.

**Max Nollert had this to say:** 'I read this novel in one row. So many passages that I still think about today. Fantastically written! You can't learn that! I want to see more!'

Book – 263 pages = €14.90

**How does it work with the boilie production at Imperial Baits?**

The most important things in making a high quality and trimmed on successful fishing boilie are attractive and fresh Ingredients and their recepies. **Max Nollert and his creative team around Imperial Baits determine and obtain from the start each recipe component**, so every meal and every flavor from which the highly successful Carptrack boilies are produced of. In the meantime their stock count around 250 places for pallets and store a huge amount of fresh ingredients as well as fresh boilies! **IB has Sales and Distribution in 12 European countries**, as well as numerous trade shows, a customer-driven marketing, and weekly intensive iBlog updates.

Various online activities, in addition to the creative and scientific work on the boilies are the main daily work for max nollert and his team.

**And IB is reaping fruits of this.**

The award „best bait manufacturer“ has now been awarded two times after 2007 and 2008 in 2011 and 2012 by the readers of the biggest german carp magazin beside the title “best german fisherman“ in 2011 and 2012 for Max Nollert.

**Carptrack baits are fished with great success by thousands of carp anglers in Europe.**

We look forward to the great feedback of our work and are always motivated to do exactly so on.

*max nollert & Team*

**Mounting of a second hall 2010/2011**

End of 2010 the decision was made to build a second large hall and not without a good reason.

**The iBoats should come...**

After many months of development work, Max Nollert and his Team published blueprints for 4 special inflatables boats. These 4 models are specifically designed and adapted for carp fishing, no Allround-boats as you know from other companys! They help angler in different situations while fishing. (Sizes: 160, 260, 320, 400)

Just in time for the 3rd January 2011, the construction was completed and the newly developed inflatables boats arrived.

**The second hall today**

Today, the second hall has over 120 additional pallet places for iboats and baits. The extra space helps us to be ready at all times for every big order to deliver reliable and quickly in all countries of Europe...

**Winter 2010/2011**
