CARP'R'US
www.carprus.eu
THE RIG SPECIALISTS
12/13

Welcome to the new face of Carp´R´Us!

Our product innovation has become even stronger as we begin an exciting expansion into Eastern and Central Europe.
We pride ourselves on being the only UK company who really listens to continental anglers and their needs. We have worked long and hard to develop new and effective products.
Everyone knows that carp fishing in the UK and Continental Europe can be very different. For that reason our team of highly skilled anglers have fished the most extreme and hardest waters to test our products to ensure that they will not fail you and that they are capable of landing the largest fish in hazardous conditions anywhere in Europe.
The highlight of our efforts this year is the creation of a new range of our ATS Hooks which we believe are the best on the market.
We have also upgraded our Fusing System to ensure maximum strength under extreme pressure.
All Carp-R-Us products will be presented in our new re-designed packaging from September 2012 and there will also be instructional videos for each product on our website. (www.carprus.eu).

I wish you maximum success with our products.

Bait Sling, Ultimate scissors

After extensive field testing we believe that out new range of A T S Technology hooks are the finest currently available on the market.

Made by probably the most respected Japanese manufacturer using the finest Japanese steel these hooks undergo an exacting tempering process to provide strength and long lasting sharpness.

A new non reflective coating, which is not Teflon ensure a long lasting corrosion resistance. Collectively these features provide everything you require from a hook.

Longshank Nailer ATS

Available in sizes: 4, 6, 8

Hooks

This hook took 3 years to develop and was secretly tested for 18 months until it was perfect and the exact shape and proportion of length was achieved. The most famous of all modern day Carp hooks it is used by the worlds most famous anglers including Tim Paisley, Kevin Maddocks, Steve Briggs Dave Moore and so many more top anglers. It has landed nearly all of the worlds famous fish including The Raduta Common and Moon Scale at Cassien and the famous 80s at Rainbow.

The BlowBack Combi Rig style presentation is one which is hard to beat but we advise that this hook is only used in open water situations even though it is strong enough for Hit and Hold fishing we advise use of our Snag hooks. With a Mouthsnagger Shorty on the shank, it will perform in just the same way but put less strain on the mouth

Many companies have tried to copy this hook but none of them have go it right. Nor can the quality of steel wire be equalled.

Cranked Hook ATS

Available in sizes: 4, 6, 8

Hooks

Designed by Frank Warwick in the early 90s and developed exclusively by us many now believe after extensive testing and use by countless anglers that this hook is the deadliest hook on the Carp scene.
This hook creates an amazing hook hold even at long distance without any mouth damage
The hair position is best off the bend and works best with use of the Bead & Ring kit and a Mouthsnagger Shorty.

The cranked section provides the fastest turnover possible and decreases the tension on the point which reduces the possibility of pull outs.-one of the best snag hooks ever made

Gladiator LS ATS

Available in sizes: 2, 4, 6

Hooks

This new pattern forms part of our range of Super Strong Ultra sharp hooks An advanced and highly specialised heating technique which has taken many years to perfect has created is a feature of our ATS range and created a breed of hook unrivalled for sharpness and strength.

This hook is perfect for general presentations except severe snag fishing and will stay sharp far longer than most other hooks.

This hook design will also produce an exceptional hook hold

Hook rotation can be even faster when used with a Shorty Mouthsnagger.

Centurion 2000 ATS

Hooks

Designed for hit nad hold snagfishing. This hook has never been known to open out or snap! Centurions are the only hooks in the CARP´R´US range with a straight point and eye but the -point to eye- angle creates a strong hook hold.

For best results use with Mouthsnagger aligner.

Continental Snag Hook ATS

Hooks

New addition to our range for this year. An improved version of our original Centurion 2000. Features a longer Ultra sharp point and slightly longer shank.

The Flip & Turn mechanism of this hook when used with a Mouthsnagger Shorty is amazing even when used with Mono or Fluorocarbon.

An ideal weapon for catching the biggest of fish from extreme snaggy areas and harsh conditions.

8Pcs. in the packet

Mouthsnagger

Mouthsnagger Aligners

Mouthsnaggers have taken the market by storm as an easy to use replacement for Shrinktube to improve the rotation of the hook when its trying to be ejected by the fish. They come in two styles Dragon Fly Larve Green, Brown, Black & Clear or as a maggot in Red. They will easily attach to any hook with a straight or downeye in any size from Size 2 to Size12. Unlike shrinktube they will not straighten out or split and do not need heat or steam to shape them and when the hook is of no further use they can be reused.
Mouthsnaggers are made from an exclusive material which will absorb any flavour or mineral in the water they come in contact with unlike any other Line Aligner material offered by other companies. A hook with a Mouthsnagger attached will totally transform the rigs efficiency and put far more fish on the bank.

Product Code	Description	TRADE PACK
CRU200101	Mouthsnagger Dragonfly Larvae - Black (8 pcs)	5
CRU200102	Mouthsnagger Dragonfly Larvae - Brown (8 pcs)	5

8Pcs. in the packet

Mouthsnagger Shorty

Mouthsnagger Aligners

Designed to make the presentation on Longshanked Hooks more compact, they will fit larger eyed or thinner wired hooks too due to their special internal shape. This perfectly shaped Mini version of our original Mouthsnagger is made from the same exclusive material which will absorb any flavour or mineral in the water that they come in contact with unlike any other Line aligner materials. Available in Brown, Green, Black and Clear For shorter shanked hooks we recommend you use the original longer Mouthsnagger.

Ray Dale -Smith Tip: Try leaving your Mouthsnagger and hook end section in your attractor or flavour to soak. Later attach your undipped bait before casting out. It's certainly worth a try.

CRU200304	Mouthsnagger Dragonfly Larvae SHORTY - Clear (8 pcs)	5

Available in 15, 25 and 45 lb / 20m per spool

Smooth Braid

Hook Links

Our Smooth Braid has been specifically designed to form an incredibly strong and supple hooklink material with a remarkably thin diameter in relation to the breaking strain.

Smooth also has a high knot strength and most popular knots may be used. 5 turn Grinner, Knotless knot or the double overhand loop knot for Combi rig attachments are favoured. Smooth has become one of the favourite braids on the market for total reliability.

Product Code	Description	TRADE PACK
CRU300115	Smooth Braid - 15lb (20 m)	3
CRU300125	Smooth Braid - 25lb (20 m)	3
CRU300145	Smooth Braid - 45lb (20 m)	3

FLUOROCARBON MATERIALS

Available in 50 lb / 30m per spool

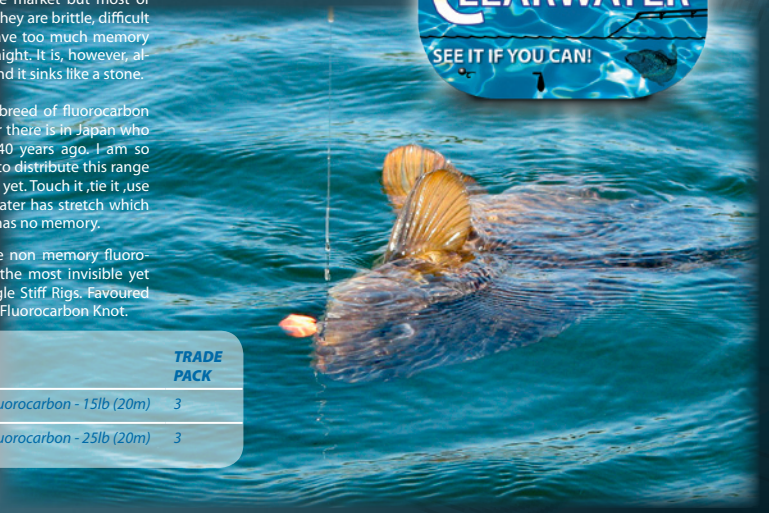
Clearwater Fluorocarbon

Hook Links

There are now so many on the market but most of them have the same problem. They are brittle, difficult to tie a good knot with and have too much memory and therefore hard to keep straight. It is, however, almost totally invisible in water and it sinks like a stone.

Carp r us Clearwater is a new breed of fluorocarbon made by the best manufacturer there is in Japan who pioneered Fluorocarbon over 40 years ago. I am so pleased to have the exclusivity to distribute this range and it is without doubt the best yet. Touch it ,tie it ,use it and you will see why. Clearwater has stretch which aids good knot strength and it has no memory.

Sinks like a stone. Extra supple non memory fluorocarbon hooklink material and the most invisible yet produced. Perfect for Anti Tangle Stiff Rigs. Favoured knots are Knotless Knots or our Fluorocarbon Knot.



Product Code	Description	TRADE PACK
CRU300215	Clearwater Fluorocarbon - 15lb (20m)	3
CRU300225	Clearwater Fluorocarbon - 25lb (20m)	3

FLUOROCARBON MATERIALS

Available in 50 lb / 30m per spool

Clearwater Shockleader

Hook Links

High abrasion resistant fluorocarbon material, ideal as a extra tough shockleader in hard snaggy conditions, fishing over razor sharp mussels etc. It would never let you down and even if other Shockleader may get damaged Clearwater will stay intact and help you land the fish.

Product Code	Description	TRADE PACK
CRU300250	Clearwater Shock Leader - 50lb (20m)	1

FLUOROCARBON MATERIALS

16lb(0,39mm) /400m

Clearwater Mainline

Hook Links

This line must not be mistaken with any co-polymer fluorocarbon coated lines. Clearwater Xtra is a high abrasion resistant pure fluorocarbon main line with low memory. Unlike any fluorocarbon yet produced Clearwater Xtra flies through the rings and resists line twist. During field tests it has out-performed all main lines and produced far more takes due to its invisibility. It is not cheap but the best never is. Spools are marked at 200 metres so you know how much you have wound on. You will not believe the results when you use it!

Product Code	Description	TRADE PACK
CRU700116	Clearwater fluorocarbon mainline 16lb (400m)	1

READYMADE FLUOROCARBON COMBI RIGS

Available in 30lb and 50lb 2pcs in the packet

360°Stiff Link 16,5cm

Hook Links

This style of link was an idea by Lee Jackson for use with the anti tangle 360° rig. This Rig system has recently been used at Rainbow lake in France with great success. It is also perfect for River and Canal fishing because it will not tangle.

The swivel eye is passed over the point of a Longshank Nailer hook followed by a rubber bead stop, an Oval ring and another bead stop (we have a Bead&Ring kit for this). This set up is perfect for Pop up or bottom bait presentation and is an easy rig to make. The beauty of this rig is that it is able to rotate in two separate ways making it very difficult for the fish to eject.

Product Code	Description	TRADE PACK
CRU403650	360° Stiff link - oval ring & 360° swivel - 16,5cm 50lb	5

READYMADE FLUOROCARBON COMBI RIGS

Available in 6.5cm, 9.5cm and 16,5cm and 30, 50 and 90lb

Stiff Link

Hook Links

These stiff Flourocarbon links are for use with Combi Link style presentations. The stiff section forces the bait away from the Lead as it lands on the bottom. The Flourocarbon is invisible when lying on the lake bed and offers a superior presentation compared to strip back coated Braids. Many 60lb + fish have been landed on these links from waters such as the famous Rainbow Lake, Raduta, Cassien and many more.

The Fused sections at each end are exclusive to Carp r Us and are stronger than any knot. The ring on one end is for rapid attachment to a quick change Gizmo Swivel. The fused loop on the other end is for easy attachment of the Combi Rig with a loop to loop method.

Product Code	Description	TRADE PACK
CRU401630	STIFF LINK 16,5 cm 30lb - oval ring/loop - (3pcs)	5
CRU401650	STIFF LINK 16,5 cm 50lb - oval ring/loop - (3pcs)	5

CRU402790	SUPERSTIFF LINK 6,5 cm 90lb - oval ring/ring swivel - (2pcs)	5

SWIVELS

8pcs in the packet

Gizmo Quick Change Swivel

Rig Accessories

A specially designed quick change swivel which will fit perfectly into virtually all lead clips and In Line Leads. The carefully shaped fitting allows easy attachment and detachment of rigs from mainline without the need to tie any knots. Due to the shape of the quick change mechanism no rubber is needed to keep the rig secure or to prevent it coming off whilst casting.

Product Code	Description	TRADE PACK
CRU501008	Gizmo Swivel - size 8	5
CRU501011	Gizmo Swivel - size 11	5

ANTITANGLE SLEEVES

15pcs in the packet

Antitangle Sleeves

Rig Accessories

Our Antitangle sleeves are ideal to use in many various situation. We recomend to use them with our Gizmo swivels – they fit perfectly. Ideal to prevent tangling while casting with soft rigs or long semi stiff rigs.

Product Code	Description	TRADE PACK
CRU505010	Anti Tangle Sleeves - long	5

SWIVELS

8pcs in the packet

Ring Swivel 360°

Rig Accessories

Ring swivel in size 11 for combi rigs or very popular 360° rig

Product Code	Description	TRADE PACK
CRU502011	360° Ring Swivel - size 11	5

SHRINKTUBES

Shrinktube Clear

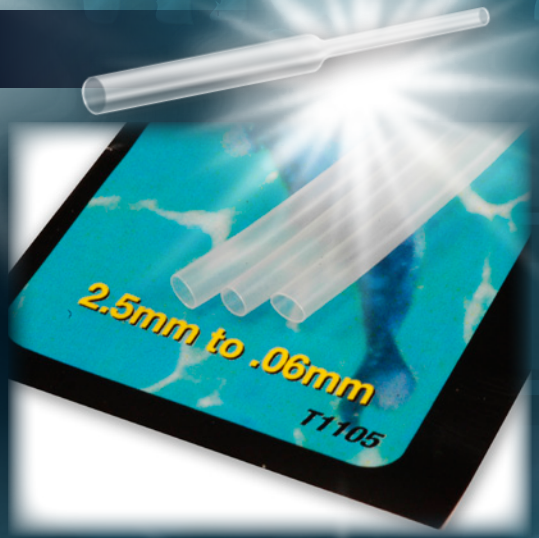
8pcs in the packet

Rig Accessories

There are many shrinktubes on the market but none like this one! It has a shrinkdown rate of almost 4 to 1 shrinking over steam or boiling water from 2.5 mm to 0.6 mm.

Perfect for trapping hairs on any normal hook size or for changing the angle on Chod or Speed rigs when wanting a different Pop Up position. For those of you who do not want to use Mouthsnaggers this shrinktube is perfect for making long curved extensions on short shanked hooks to improve the rate of hook turn.

Product Code	Description	TRADE PACK
CRU505510	Shrinktube Clear	5



SHRINKTUBES

Shrinktube Multicolor

8pcs in the packet

Rig Accessories

This has a 2 to 1 shrink rate and is a great deal stiffer and thicker mainly for continental use. Ideal for withy pool type set ups.

Product Code	Description	TRADE PACK
CRU505511	Shrinktube Multi Colour	5

BOILIE HAIRS AND STOPS

Ready Hairs

Available in 3 sizes: small, medium and large 3pcs in a packet

Rig Accessories

Fused fluorocarbon hairs for extra special presentation. Small fish or crayfish will never tangle them. Ideal for use with our Bead&Ring kit or Long Distance Bead&Ring kit.

Product Code	Description	TRADE PACK
CRU407001	Clearwater Ready Hairs - small (3 pcs)	5
CRU407002	Clearwater Ready Hairs - medium (3 pcs)	5
CRU407003	Clearwater Ready Hairs - large (3 pcs)	5

BOILIE HAIRS AND STOPS

Quick Hair Stops

10pcs in the packet

Rig Accessories

The worst thing about any hair rig is having to use the traditional boilie stop. Ever tried to attach one in the dark when the braided loop has frayed, or the bait is larger than the last one and the hair is not long enough to slide the stop through the loop? Worry no longer!

Quick Hair Stops are an ingenious way to secure your bait on the hair. They are permanently attached to the Hair Loop. Just pull on bait and rotate the Quick Stop to form a T across the bait and pull into conceal. You will never want to use a boilie stop again.

Product Code	Description	TRADE PACK
CRU503550	Quick Hair Stop - large	5

PROTECTION AGAINST CRAYFISH

Available in 2 sizes: small and large

Rap-it

Rig Accessories

With the vast increase of crayfish in our water networks this is the product to protect those baits from being nibbled away in minutes. If you are going to Europe to fish, this gear is a must as the Crayfish and tiny catfish Poisson Chat will eat your bait in minutes.

If you want to make halibut pellets last for hours just wrap them in this – your bait will still leak out flavours and attract fish. Just cut off a piece the width of your bait, put the bait inside and shrinkdown over steam or immerse in boiling water. Works on luncheon meat as well. One pack will protect up to 30 baits

Product Code	Description	TRADE PACK
CRU750102	Rapit Protection Wrap - medium	5
CRU750103	Rapit Protection Wrap - large	5

WEEDY WRAP

Available in green and brown colours 2meters/10meters in the packet

Weedy Wrap

Rig Accessories

We all know that fish love weed and the food they find in it so it follows that if we can make our braided hook link look and feel like the weed the fish are in we stand a greater chance of catching them. It is easy to attach and also works on leadcore just wind it around the hook link or leader secure it with shrink tube or a small piece of silicone tube and that's it. You will definitely catch the bigger fish.

Product Code	Description	TRADE PACK
CRU507102	Weed Wrap brown (2 m)	5
CRU507103	Weed Wrap green (2 m)	5

RING KITS

20 beads and 10 rings

Bead&Ring Kit

Rig Accessories

These beads have been purposely designed for use with Sliding Ring Rigs or the 360º Rig. They are made from a special material which will not move around on hook shanks. They are also useful for making adjustable hair rigs or holding hairs on the bend of the hook. The material is see through for easy and precise attachment to the hook.

Product Code	Description	TRADE PACK
CRU504010	Bead & Ring Kit	5

RING KITS

12 beads and 6 rings

Bead&Ring Kit Long Distance

Rig Accessories

Specialized version of our Ring&Bead Kit for long distance casting. Provides longer beads for greater adhesion to the hookshank.

Product Code	Description	TRADE PACK
CRU504011	Bead & Ring Kit – Long distance	5

LEAD SYSTEMS

Available in weed and silt colours. 6pcs in the packet

Snag Clip

Lead Systems

This is the only truly safe lead clip in the world that has the following features:

1.Allows the angler to release the lead or weight by pulling from his end of the rod with three different release strengths Soft, Medium and Hard. All other clips are designed for the fish to pull off the lead pulling from the fishes end. Why should just the fish control this feature – you should.

2.The only clip to allow the fish to dispense with the line, leader and the lead should the main line break.

3.Ideal when fishing at extreme range. May be used safely with Lead core, abrasion resistant leaders or braided mainline

Product Code	Description	TRADE PACK
CRU600108	Snag Clip - silt (6 pcs)	5
CRU600109	Snag Clip - weed (6 pcs)	5

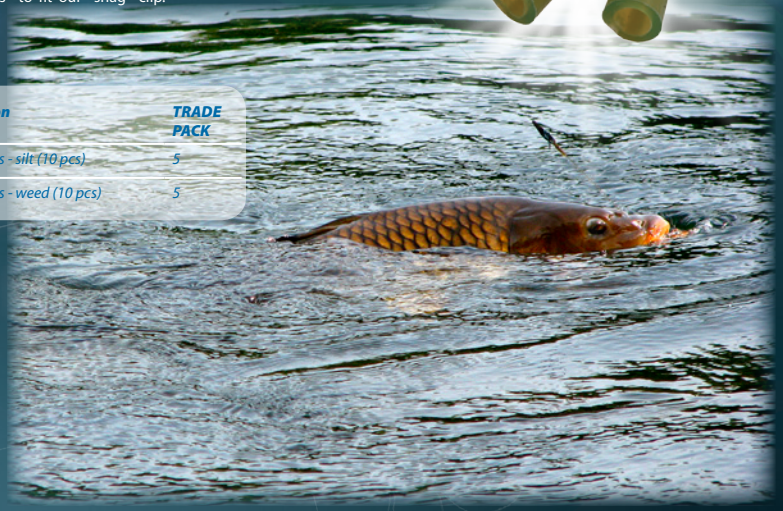
LEAD SYSTEMS

10pcs in the packet

Tail Rubbers

Lead Systems

Colour matching tail rubbers to fit our snag clip. Weed and Silt colouurs.



Product Code	Description	TRADE PACK
CRU600208	Tail Rubbers - silt (10 pcs)	5
CRU600209	Tail Rubbers - weed (10 pcs)	5

LEADCLIP SYSTEMS

10pcs in the packet

Snag Clip 5mm Rings

Lead Systems

The secret behind how our snag clip works is due to the simple attachment of a 5mm ring to the end of the leader or mainline the clip must be used with them or the safety advantage just will not work.

Product Code	Description	TRADE PACK
CRU600301	Snag Clip Rings - 5mm (10 pcs)	5

READYMADE LEADCLIP SYSTEMS

1pcs in the packet

Snag Clip System

Lead Systems

A ready assembled snag clip on a fused fluorocarbon leader includes Tail rubber and Gizmo Quick change swivel. Each leader has a fused loop at one end for easy attachment to the mainline. By the Loop To Loop method or our trusted fluorocarbon knot. Available in weed or silt colours.

Product Code	Description	TRADE PACK

CRU404650	Snag Clip System - weed 92cm 50lb (1 pce)	5

HELICOPTER RIGS AND KITS

Safety Running Helicopter Kit

For 5 complete helicopter rigs

Lead Systems

Allows you to make 5 complete Running Helicopter rigs for use on any type of line or leader. The kit also includes Power gum to make the simple stop knot between the 2 small beads. Full step by step instructions included.

Product Code	Description	TRADE PACK
CRU600401	Safety Running Helicopter Kit	5

HELICOPTER RIGS AND KITS

Safety Helicopter System

1pcs in the packet

Lead Systems

This system is ideal for fishing over silt or weed as it allows the rig to be presented on top of the silt/weed - not in it. The system may be adjusted so that the rig is further away from the lead – ideal for lead shy fish.

Similar to our Snag clip system the fish cannot trail line should a breakage occur and it is the only running Helicopter rig system in production with a unique double indication system. Comes ready assembled on a Fluorocarbon leader with a Gizmo Quick change swivel. The only simple and efficient way to attach Chod rigs or Speed rigs.

Product Code	Description	TRADE PACK
CRU409050	Helicopter Leader Ready - 90cm 50lb (1 pce)	5

1pcs in the packet

Bait Sling

Accessories

This simple device has taken the market by storm. Why? When attached to the mainline of an ordinary rod with an ordinary reel this sling will propel balls of groundbait up to 50mm in diameter over 100 metres with extreme accuracy. It gets even better! The pouch can be clipped up on the Reel Spool Line Clip so it only travels 5-10 meters because once the ball has been propelled the sling just drops in the front of you making retrieval simple with no effort unlike a Spod.

Product Code	Description	TRADE PACK
CRU900101	Bait Sling	3

1pcs in the packet

Ultimate Scissors

Accessories

The best scissors you can get for all the materials. Cuts thru braid or mono like you can´t believe. And what is important – stay sharp for long long time.

Product Code	Description	TRADE PACK
